

Ultracoat®

Don't replace your luxury vinyl flooring – ReNewIt!

Luxury vinyl tile/plank (LVT/LVP) flooring is designed to be both aesthetically pleasing and hygienic. It takes a beating from foot traffic and cleaning – becoming worn and trapping dirt/bacteria in the process. Rather than removing and replacing your LVT and LVP floor, you have another solution – one that will help save time, money and the environment.

MAPEI, a world leader in chemical products for the construction industry, has designed systems to quickly and efficiently solve your floor maintenance problems: Clean, renovate and protect your existing LVT/LVP flooring using our *Ultracoat® ReNewIt™* systems.

For more information, contact your MAPEI representative or visit www.mapei.us.

MAPEI USA

Ultracoat®

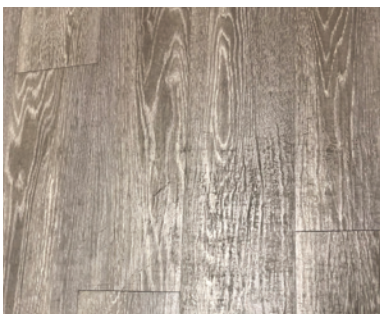

The ingredients for LVT/LVP renewal

Clean the existing floor with a one-two punch of *Ultracoat ReNewIt Remover* and *Ultracoat ReNewIt Cleaner*. *Ultracoat ReNewIt Remover* is a cleaner and polish remover that provides a deep-down cleaning, removing existing contaminants from the floor. *Ultracoat ReNewIt Cleaner* is a spot-free cleaner and rinsing solution designed to remove any remaining dirt before the application of *ReNewIt Primer*.

Renovate and protect the existing flooring with *Ultracoat ReNewIt Primer*, *Ultracoat HT 2K* or *Mapecoat™ 4 LVT*. *Ultracoat ReNewIt Primer* quick-drying bonding agent allows the new finish to adhere to the existing floor. *Ultracoat HT 2K* low-odor, low-VOC, polyurethane finish renovates and hermetically seals the existing flooring, reducing the chance for mold, bacteria and germs to form between floor joints. If needed, *Mapecoat 4 LVT* finish can be used instead of *Ultracoat HT 2K* to provide an additional measure of non-slip resistance.

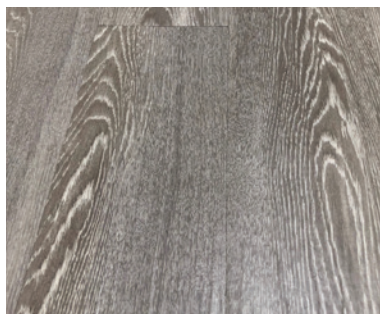

Instead of tearing up your existing LVT/LVP floor, *ReNewIt...* with help from MAPEI. To find out more, contact your MAPEI representative or visit our Website at <https://www.mapei.com/us/en-us/home-page#/search?text=Ultracoat%20renewit&menu=Products>.

Before

Rather than replacing this LVT floor, the owners decided to renew it with an *Ultracoat ReNewIt* system.

After

The *Ultracoat ReNewIt* installation process cleans and protects the existing LVT, restoring it to vibrant life.

MAPEI's *Ultracoat ReNewIt* systems can include the following products for a complete floor cleaning and renovation system:

- *Ultracoat ReNewIt Remover*: Ready-to-use and works quickly to remove polish and contaminants from the floor
- *Ultracoat ReNewIt Cleaner*: Ready-to-use; removes contaminants and will not leave a residue on the floor
- *Ultracoat ReNewIt Primer*: 2-component bonding agent; clear and quick-drying to ensure adhesion of the new finish to the existing flooring
- *Ultracoat HT 2K*: 2-component waterborne polyurethane finish; low-odor, low-VOC and UV-resistant, providing superior resistance to traffic and abrasion; protects and hermetically seals the joints making the flooring look newer, easier to clean and maintain, thereby providing a cleaner environment at a lower cost of maintenance
- *Mapecoat 4 LVT*: 2-component aliphatic, anti-slip polyurethane finish in water dispersion; provides a non-slip finish with a high resistance to wear

Ultracoat ReNewIt systems seal the joints, creating an attractive, protected, monolithic coating that withstands wear and tear and will be easier to clean. Contact your MAPEI representative today.
