

Mapeguard[®] Shower System

For single-source, fast-track shower installations

MAPEI's *Mapeguard* Shower System, featuring *Mapeguard Drain* with an integrated bonding flange, allows contractors to install the drain, float the shower base, waterproof, flood-test, tile and grout in one day.

Here's how the system fast-tracks your shower installation:

- Float the shower base with *Planislope™ RS*.
- Waterproof using *Mapelastic® Turbo* and flood-test after 3 to 4 hours.
- Tile and then grout.

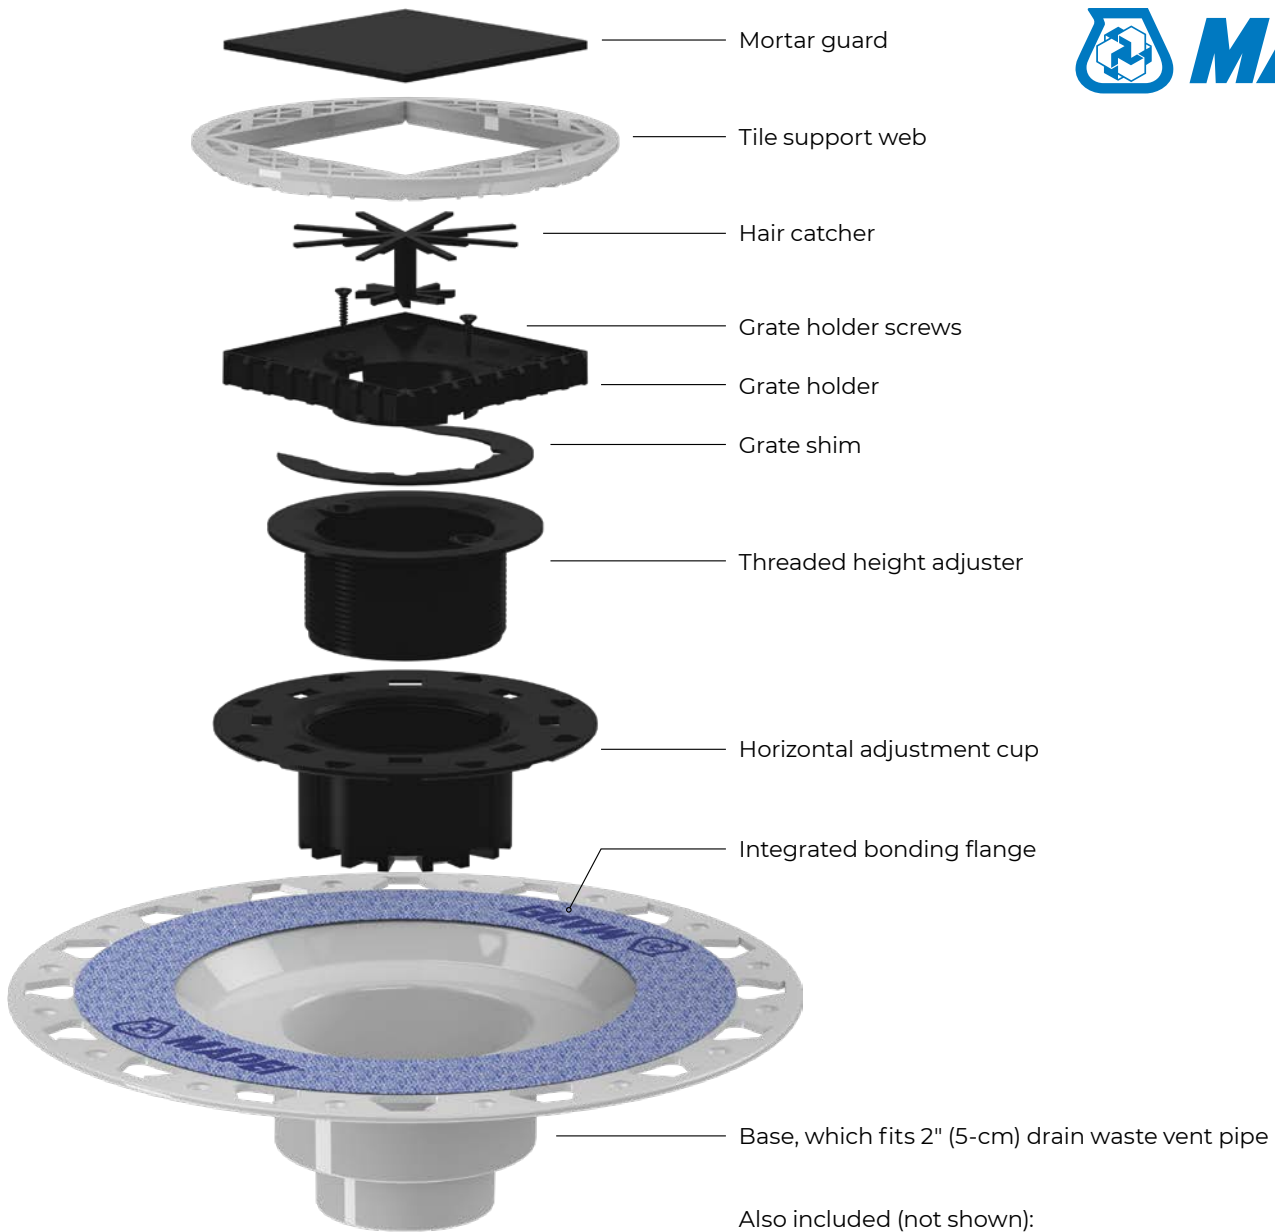

Mapeguard Drain's innovative design makes installation easy, while providing adjustment for varying tile and stone thicknesses with lock-in-place drain-height precision. Use of all premium products as a single-source system will qualify for a lifetime warranty.

MAPEI's *Mapeguard* Shower System – the name says it all. It offers the quality you trust with enhanced speed, adding up to greater productivity and warranted protection on your next waterproofing installation.
