Mapecoat TNS systems are an extensive line of technically advanced, multilayered, acrylic-based systems used to create highly attractive and uniform playing surfaces for tennis, pickleball, volleyball, padel tennis and other sports. Suitable for indoor and outdoor applications on asphalt, concrete and existing acrylic substrates, *Mapecoat TNS* systems form highly UV-resistant, long-lasting and low-maintenance sports surfaces that are perfect for every job and climate. *Mapecoat TNS* systems are fully customizable, and available in ITF court pace ratings for consistent playing speed and ball bounce.

Mapecoat TNS Professional

Mapecoat TNS Professional is a highly flexible, durable and UV-resistant acrylic-based coating system for sports surfaces that uses *Mapecoat TNS Base Coat* to create highly uniform and aesthetically pleasing surfaces.

Mapecoat TNS Reinforced

Mapecoat TNS Reinforced system is applied by integrating *Mapenet™ Reinforced* fiberglass mesh for refurbishing sports surfaces. It has been specifically developed as a crack-repair system for installation over existing damaged asphalt substrates.

Mapecoat TNS Cushion

Mapecoat TNS Cushion is a semi-elastic, acrylic-based sports surface composed of select rubber granules that are dispersed in MAPEI's proprietary, highly flexible acrylic binder. It creates seamless, impact-reducing sports surfaces for improved playing comfort and safety.

Mapecoat TNS Comfort

Mapecoat TNS Comfort is a 5-mm, acrylic-based system utilizing *Mapecomfort™ R4* rubber underlayment to create long-lasting, cushioned sports surfaces that limit impact force and provide exceptional player comfort and safety.

Mapecoat TNS Comfort Elite

Mapecoat TNS Comfort Elite is an 8-mm, elastic, acrylic-based system that uses *Mapecomfort R7* rubber underlayment along with *Mapenet Reinforced* fiberglass mesh. It creates extremely durable, comfortable and impact-reducing sports surfaces that resist telegraphing of substrate cracking.
