

MAPEI's *Planiprep*™ Dust-Free Subfloor Preparation Solutions

Introducing a warranted MAPEI system of *Planiprep* products for adhesive removal, concrete cleaning and capping

How do I get out of this?

No doubt, you've come to a jobsite and discovered that you can't proceed because:

- Old adhesive residue needs to be removed, but you can't shotblast.
- An abatement company has been there and left "who knows what" on the floor.
- Oil stains are on the surface.
- High moisture has caused a floor failure.
- Traditional grinding or sanding the subfloor is not allowed due to the generation of silica dust.

The solutions are:

Remove adhesive residues with **Planiprep AR adhesive remover**.

Features and Benefits

- Quickly softens and helps lift adhesives from concrete substrates
- Replaces the need to shotblast for adhesive removal
- Easy to use and minimizes labor for adhesive removal

Scour the surface with **Planiprep SA concrete scouring agent** to remove **Planiprep AR** residues and etch the concrete surface.

Features and Benefits

- Lifts out many common concrete contaminants such as oils, post-abatement chemicals and adhesive removers such as *Planiprep AR* adhesive remover
- Can be used to neutralize high-pH concrete slabs with pH's greater than 12
- Etches the surface of highly polished concrete and converts it from being nonporous to porous without generating silica dust

Cap the concrete subfloor with **Planiprep ET epoxy concrete subfloor treatment** to lock out any remaining **Planiprep AR** or **Planiprep SA**, and to control subfloor moisture.

Features and Benefits

- Low-odor and VOC-compliant for use in interior, occupied environments
- Extended working time, allowing epoxy to penetrate deeply into the substrate
- Provides subfloor moisture control up to 15 lbs. (6,80 kg) MVER and 99% RH

Finish the floor with these great MAPEI products

For patching or leveling over the cured surface of *Planiprep ET*, first prime with *Primer T™* at full strength and then use your choice of a MAPEI patch, skimcoat or self-leveler.

Direct-Bond Adhesives*

Ultrabond ECO® 810

Professional carpet tile adhesive

Ultrabond ECO 885

Premium polyolefin-backed carpet adhesive

Ultrabond ECO 350

Professional solid vinyl sheet and tile adhesive

Ultrabond ECO 360

Premium high-performance adhesive for solid vinyl sheet, tile and plank

Ultrabond ECO 373

Universal, pressure-sensitive multi-flooring adhesive

Ultrabond ECO 560

Premium, universal rubber-flooring adhesive

Ultrabond ECO 962

Premium, pressure-sensitive engineered-wood-flooring adhesive

Ultrabond ECO 711

Premium, clear, thin-spread VCT adhesive

Ultrabond® G19

Professional, two-part urethane flooring adhesive

Ultrabond G21

Premium, two-part urethane flooring adhesive

Ultrabond G15

Premium, fast-setting epoxy flooring adhesive

* These adhesives can be direct-bonded to Planiprep ET following instructions for use over nonporous substrates. All other MAPEI adhesives must be installed over Planiprep ET that has been primed with Primer T and skimcoated with Planiprep SC or covered by a MAPEI self-leveling underlayment.
