MAPEI ADHESIVES RECOMMENDED FOR VINYL

ULTRABOND ECO 380

Specific for vinyl with strong initial tack, leg effect and extended open time.

Other Mapei adhesives recommended for vinyl

ULTRABOND ECO V4 SP

High-performance, multi-purpose adhesive.

ULTRABOND ECO V4 SP CONDUCTIVE

For conductive and static dissipative vinyl floor coverings.

ULTRABOND ECO CONTACT

Water-based contact adhesive, immediate grab.

ULTRABOND ECO VS 90 PLUS

Rapid adhesive, forms a rigid, tough film.
Good dimensional stability.

MAPECRYL ECO

Rapid hold, rapid initial tack.

ULTRABOND ECO FIX

Tackifier for loose-lay vinyl floor coverings.

MAPECONTACT

Double-sided reinforced adhesive strip.

ROLLCOLL

Applied by roller, including on walls.

ADESILEX G19

Two-component, epoxy-polyurethane adhesive. For installing on all types of substrate, including in damp areas or areas that need frequent cleaning; suitable for floors subjected to intense traffic and heavy loads.

PALAZZO LOMBARDIA - MILAN - ITALY

The tower and the entire architectonic complex of the new headquarters of the Lombardy Regional Government are part of a redevelopment project in the Garibaldi-Repubblica area of Milan. Mapei has always had a strong bond with its home city and played an active part in recommending the most suitable, cutting-edge products to skim and level off surfaces and to install carpet and loose-lay vinyl textile tiles on the floors and stairs.

Products used:
NIVORAPID, MAPECONTACT, ULTRABOND ECO FIX.

Products which are safe for the environment and end users alike for eco-sustainable solutions.

Project certified according to:

SANT'ANNA HOSPITAL - COMO - ITALY

The actual floor area of the new hospital extends over more than 75,000 square metres, while the hospital itself has 62 technical beds, 15 operating theatres, with a further 4 theatres dedicated to endovascular operations, and an outpatients department with 64 surgeries.

Mapei supplied a series of products to prepare the substrates and bond the floor coverings.

Products used:

ULTRAPLAN ECO, **PIANOCEM M**, **TRIBLOCK P**,
MAPECRYL ECO, ULTRABOND ECO 380.

Products certified by the most accredited international standards, the result of Mapei's intense research work into eco-sustainable solutions that are safe for the environment and end user alike.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

CA' GRANDA NIGUARDA HOSPITAL - MILAN - ITALY

For the new buildings that make up the South Block of the Ca' Granda Niguarda Hospital, Mapei supplied the most appropriate solutions to apply the substrate screeds and to install the linoleum floor coverings.

Products used:

ADESILEX PG1, EPOJET, EPORIP, GRANIRAPID, KERAQUICK, KERAFLEX MAXI S1, MAPEFILL, **MAPEGRID G 220**, **MAPEGROUT HI-FLOW**, MAPEGROUT T40, MAPEFER 1K, MAPESIL AC, MAPELASTIC, **PLANITOP HDM**, **PLANITOP HDM MAXI**, PRIMER G, **TOPCEM**, **TOPCEM PRONTO**, ULTRAPLAN ECO, ULTRAPLAN ECO 380, ULTRABOND ECO V4 SP, **ADESILEX MT32**.

Products with CE marking certified by accredited international bodies, developed in Mapei's R&D laboratories, safe for the environment and the end user alike.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

GEELONG HOSPITAL - VICTORIA - AUSTRALIA

Geelong is the home of one of the most important hospitals in the State of Victoria and is administered by Barwon Health, the Australian National Health Service. In 2008 work was commissioned to extend the A&E department of the hospital. Mapei Australia was asked to supply products and their technical support to help in the entire, rapid installation of around 1600 m² of vinyl floor coverings.

Products used:

ECO PRIM T, MAPEGUM WPS, MAPELASTIC SMART, MAPEPRIM SP, NIVORAPID, **TRIBLOCK P**, ULTRABOND ECO 350, ULTRAPLAN.

Products with a low content of volatile organic compounds, testament to Mapei's research into eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

Project certified according to:

green building council australia

BE-FIT GYMNASIUM - LODI - ITALY

400 m² of wood-effect LVT planks were installed using the new adhesive ULTRABOND ECO 4 LVT, specifically formulated by the Mapei laboratories for the installation of LVT floor coverings to guarantee maximum performance in terms of adhesion and dimensional stability.

Products used:
ULTRABOND VS 90 PLUS, ULTRAPLAN, ECO PRIM T.

Products certified by the most highly accredited international bodies, developed in Mapei's R&D laboratories to safeguard the environment and the health of those who use them.

B4 BOSCOLO HOTEL - MILAN - ITALY

The B4 Hotel, part of the Boscolo chain, is located in Milan in Via Stephenson, near to the Rho-Fiera and Fiera Milano City exhibition hub, the future site of Expo 2015. The architectural design work carried the signature of the architect Giancarlo Marzorati while the interiors were designed by the architect Simone Micheli. In 2009 the project won the “Golden Brick Real Estate Award” for the best tourism and hotel project. Mapei was involved in the construction of this important building and assisted the designers and contractors during the execution of the architectonic structure.

Products used:

MAPELASTIC FOUNDATION, MAPEGROUT T60, **MAPEPROOF**, **MAPEPROOF CD**, MAPEGROUT 430, NIVORAPID, **PLANIPATCH**, PRIMER G, ULTRAPLAN ECO, **ADESILEX VZ**, ULTRABOND ECO V4 SP, **ADESILEX MT32**, ROLLCOLL, ULTRABOND ECO FIX, **ULTRABOND ECO 310**.

Products with CE marking are the result of Mapei's research into the development of eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

THE SPACE CINEMA - GENOA - ITALY

A multi-screen cinema run by The Space Cinema Genoa was recently opened in the old dock area of the city. The idea of the project was to enhance the exclusive location of the cinema in the renowned "Cotton Warehouses" designed by Renzo Piano. In fact, the idea was to recover some of the empty industrial spaces and breathe new life into this large entertainments centre. Wood and stone effect vinyl floor coverings were installed in the theatres and corridors using Mapei products.

Products used:

ADESILEX V4, NIVORAPID, PLANIPATCH, PRIMER G, ULTRAPLAN ECO.

Products with CE marking certified by the most accredited international bodies, for eco-sustainable solutions that are safe for the environment, workmen and the end user alike.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

HOUSE OF REPRESENTATIVES - BRUSSELS - BELGIUM

LVT planks were installed on raised floors with metal panels using an adhesive specifically created in the Mapei research laboratories for this type of application: **ULTRABOND ECO TACK LVT**. This product reduces the tendency of the planks to expand and shrink around their ends and joints.

Products used:
ULTRABOND ECO TACK LVT.

Product with low emission level of volatile organic compounds, testament to Mapei's research into eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

COMMUNAL CULTURAL CENTRE - LOVERE COMMUNAL LIBRARY - BERGAMO - ITALY

PRODUCTS FOR RUBBER

Green Star™ certified system for installing rubber floor coverings on concrete substrates with a high residual moisture content

- 1** Concrete floor
- 2** Vapour barrier*
- 3** Self-levelling compound
ULTRAPLAN

- 4** Adhesive
ULTRABOND ECO V4 SP FIBER

INFANT SCHOOL - CARROBBIO DEGLI ANGELI (BERGAMO) - ITALY

To create the inside of the rooms in this modern infant school, Mapei supplied various solutions to level off the substrates and install rubber floor coverings.

Products used:
NIVORAPID, ECO PRIM T, ULTRABOND ECO V4 SP.

Products with CE marking certified by the most accredited international bodies, for eco-sustainable solutions.

ELEMASTER - LOMAGNA (LECCO) - ITALY

To overcome the problem of ESD (electrostatic discharge) in this recently-built electronics factory, Mapei's expertise was requested to install rubber floor coverings.

Products used:

ADESILEX G19 CONDUCTIVE, **ADESILEX VZ CONDUCTIVE**, EPORIP, ECO PRIM T, **TOPCEM**, ULTRAPLAN.

Products with CE marking certified by accredited international bodies, developed in Mapei's R&D laboratories.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

SAN LUCA HOSPITAL - MILAN - ITALY

The San Luca Italian Institute for Auxology was recently extended with the construction of a new building opposite the existing one. One of the requirements of the client was the use of only eco-sustainable repair and installation products, especially for the rubber floor coverings. This is why Mapei technicians chose a series of products that, apart from guaranteeing excellent final performance characteristics, had a low impact on the environment.

Products used:
EPORIP, NIVORAPID, PLANIPREP SC, ECO PRIM T, ULTRAPLAN ECO, ULTRABOND ECO V4 SP, **ULTRABOND ECO VS 90**.

Products with CE marking certified by the most highly accredited international bodies, testament to Mapei's research work into eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

SERENA FOUNDATION NEMO MEDICAL CENTRE - MILAN - ITALY

On the 23rd of May 2012, inside the Niguarda Ca' Granda Hospital in Milan, the new 1,000 m² area within the Serena Onlus Foundation NeMo Medical Centre was inaugurated. Renovation work on the new area in the NeMo Centre included the installation of more than 1,000 m² of rubber floor coverings and another 1,000 m² for the walls. Mapei supplied products specifically made for installing rubber floor and wall coverings for this site.

Products used:
EPORIP, PRIMER G, NIVORAPID, PLANIPREP SC, **LIVIGUM**,
ULTRABOND ECO V4 SP FIBER.

Products with CE marking, developed in the Mapei R&D laboratories to safeguard the environment and the health of those who use them.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

PIRELLI TOWER - MILAN - ITALY

The Pirelli Tower underwent major internal and external restructuring work.

Mapei was contacted to take an active part in repair work carried out on the Tower, during which numerous square metres of linoleum and rubber floor coverings were installed.

Products used:

ADESILEX P4, **ADESILEX P10**, **ADESILEX PG1**, **CARBOPLATE**, **EPOJET**, **EPOJET LV**, **EPORIP TURBO**, GRANIRAPID, ISOLASTIC, KERAQUICK, KERAFLEX, LATEX PLUS, MAPEFER, **MAPEWRAP PRIMER 1**, **NIVOPLAN**, PLANICRETE, **PLANITOP 400**, **STABILCEM SCC**, ULTRACOLOR, **ADESILEX MT32**, LATEX PLUS, NIVORAPID, PRIMER G, **PRIMER MF**, **TOPCEM PRONTO**, **ULTRABOND ECO 540**, ULTRABOND ECO V4 SP, ULTRAPLAN.

Products with CE marking certified by the most accredited international bodies, for eco-sustainable solutions that are safe for the environment, workmen and the end user alike.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

LYRECO COMPANY CRÈCHE - MARLY - FRANCE

Lyreco is very sensitive when it comes to sustainable development and protecting the environment and chose a company specialised in ecological company crèches. The result is “Lyreco Kids”, an eco-sustainable construction in credit with its carbon footprint, created using prestigious natural materials containing no phthalates or formaldehyde. In accordance with the guidelines for this project, only installation products which respect the environment and people’s health were employed, which is why Mapei products were chosen.

Products used:
EPORIP, **MAPESOL 3**, PRIMER G, **ULTRABOND ECO 540**.

Products with a low content of volatile organic compounds, testament to Mapei’s research into eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

L'AURORA-BACHELET MIDDLE SCHOOL - CERNUSCO (MILAN) - ITALY

Mapei took part in the construction of the new "class A" school by supplying material for the installation of 300 m² of linoleum.

Products used:
EPORIP, PRIMER G, ULTRAPLAN ECO, **ADESILEX LP**,
ULTRABOND ECO 520.

Products with CE marking, the result of Mapei's research into the development of eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

UNIVERSITY OF EINDHOVEN - THE NETHERLANDS

During renovation work on the rooms inside the university, Mapei products were used to repair and level off the flooring substrates and to install linoleum floor coverings.

Products used:
PRIMER G, NIVORAPID, ULTRAPLAN ECO, **AQUACOL T**.

Products with low emission level of volatile organic compounds, testament to Mapei's research into eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

HENRY B. GONZALES CONVENTION CENTRE - SAN ANTONIO - TEXAS - USA

At first glance you remain speechless. Even though it looks like a giant painting on the floor, it is really a masterpiece of floor installation, created inside the Henry B. Gonzales Convention Centre in San Antonio, Texas. The image is impressed on the carpet and is part of a new floor covering extending over a total surface area of 32,000 m². Mapei contributed to the execution of this project by supplying the most appropriate technical solutions.

Products used:
ULTRABOND ECO 220, ULTRAPLAN M20, PLANIPATCH,
ULTRABOND ECO 575, ULTRABOND ECO 710.

Products certified by the most accredited international bodies, the result of Mapei research work, safe for the environment and end user alike.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

HOTEL DE ROME - BERLIN - GERMANY

In the historic Bebelplatz in Berlin a luxury hotel has opened its doors to its exclusive clientele. Enormous importance was given to the design and quality when choosing both the materials and finishing products used. One of the key elements that make the internal areas both comfortable and elegant is the use of carpet for the floors in the corridors and guest rooms of the hotel. To install the textile and linoleum floor coverings, the installation company selected Mapei products for their reliability and safety.

Products used:
NIVORAPID, **PLANITEX D10**, PRIMER G, ULTRABOND ECO 540,
ULTRABOND ECO 185.

Products with CE marking certified by the most accredited international bodies, for eco-sustainable solutions that are safe for the environment, workmen and the end user alike.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

NEW SAP ITALIA HEADQUARTERS - VIMERCATE - ITALY

The new Energy Park technology hub, built according to architectonic principles and cutting-edge high technology in terms of both environmental sustainability and the rationalisation of energy consumption, is located in a strategic point with respect to the grand communications networks in the North-East. To respect the parameters of LEED Gold certification, Mapei Technical Services recommended the use of ULTRABOND ECO FIX to install the loose-lay textile flooring tiles, a solvent-free, acrylic resin-based adhesive in water dispersion.

Product used:
ULTRABOND ECO FIX.

A product with low emission level of volatile organic compounds, testament to Mapei research into eco-sustainable solutions to help earn LEED award points.

Project certified according to:

TRUMP INTERNATIONAL HOTEL & TOWER - TORONTO - CANADA

Located on the north-western banks of Lake Ontario, Toronto is the financial centre of Canada with picturesque historical districts, large parks, museums, art galleries, theatres, restaurants and bars. The Trump International Hotel and Tower, a newly-constructed skyscraper for both hotel and residential use, is located within this setting and Mapei took part in this project by supplying the most suitable solutions to overcome various on-site problems.

Products used:

PRIMER MF, ULTRA/BOND ECO FIX, ULTRABOND P990 1K.

Products with CE marking certified by accredited international bodies, developed in Mapei's R&D laboratories, for eco-sustainable solutions.

*Products in **bold** are not currently available in Australia. Please contact Mapei for a suitable alternative.*

SUSTAINABILITY

MAPEI: FOR MORE THAN 30 YEARS, CERTIFIED SOLUTIONS FOR ECO-SUSTAINABLE PROJECTS WORLDWIDE

CERTIFICATION.

Mapei concretely promotes sustainability by joining international programmes and organizations and developing technologically-advanced products and solutions which contribute to safeguarding the environment and the health of workers and users.

CERTIFIED PRODUCTS.

Mapei products are certified according to the most accredited international standards. They are formulated using innovative, recycled and ultra-light raw materials developed to reduce energy consumption and to have very low emission level of volatile organic compounds.
