

MAPEFIX RANGE

Certified chemical anchors

Mapefix PE SF

Adhesive for chemically anchoring metal bars in holes made in building materials such as concrete and masonry. Ideal for heavy loads.

- ✓ Styrene-free
- ✓ Ultra-rapid hardening
- ✓ Special zero-waste cartridges
- ✓ For damp substrates and temperatures down to -5°C
- ✓ MAX 52.2 kN M24

300ml

420ml

Mapefix VE SF

Hybrid vinyl resin-based chemical anchor for structural loads. Certified for threaded bar, construction bars and C1 seismic loads.

- ✓ Rapid-hardening
- ✓ Suitable for wet surfaces
- ✓ For every type of material
- ✓ For structural anchors including in C1 seismic-risk zones
- ✓ MAX 88.9 kN M30 Ø 32

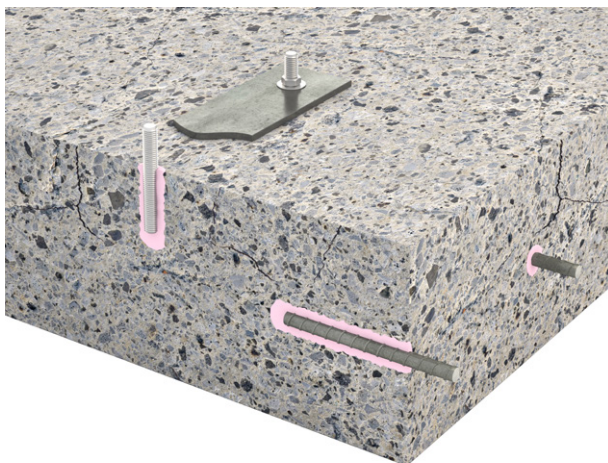

300ml

420ml

Mapefix EP 100

A two-component chemical anchor ideal for structural loads including C1 and C2 seismic loads.

- ✓ For all materials
- ✓ For cracked concrete and smooth and rough holes
- ✓ Extended workability
- ✓ Maximum mechanical strength and chemical resistance
- ✓ 100 year service life
- ✓ MAX 135.2 kN M30 Ø 32

585ml

Chemical anchoring solutions

The **Mapei** range of certified chemical anchors for all your design and site needs: light, heavy, structural and seismic loads.

The **Mapefix** range:

- ✓ Easy to use
- ✓ Safety for professionals
- ✓ Simplicity for the user
- ✓ Strength for everybody
