PROJECT REFERENCES

ANZAC CENTENARY MEMORIAL WALK in ADELAIDE

As part of Australia's celebrations of the brave Anzacs being commemorated around the country, the Anzac Centenary Memorial Garden Walk on Kintore Avenue in Adelaide's CBD (Central Business District) was opened last year, providing a fitting tribute to the ultimate sacrifice made by Australians during past wars and conflicts.

A 70 metre interpretative wall made from 58 polished Adelaide black granite, features in the newly completed 280 metre Anzac Centenary Memorial Walk in Adelaide, South Australia.

The granite wall depicts Australian society through a century of conflict, and honours more than 102,000 Australian servicemen and women who died serving their country. 1020 markers have been etched into the granite wall with each marker representing the loss of 100 sailors, soldiers, airmen and women.

Commercial Ceramics and Stone (local Adelaide granite supply and installation company) supplied and installed the local black granite panels on the main Anzac Wall, along the boundary below the open blade fencing, as well as creating stunning planter boxes and garden bed surrounds using the same black granite material. Low concrete garden surrounds were created, providing a solid surface for fixing the granite in these areas. *Plastimul* (multi-purpose bituminous waterproofing emulsion) was applied to the internal concrete surfaces to ensure their complete protection from any aggressive agents present in the soil. *Eco Prim Grip* (multi-purpose bonding promoter primer) was subsequently rolled onto all other concrete faces to guarantee a solid bond for the adhesive.

Mapei's *Keraflex Maxi S1* (high performance, deformable cementitious adhesive especially formulated for the installation of large format tiles) was the perfect adhesive selection for the

bonding of the large format black granite panels. *Ultracolor Plus* (high-performance, quick setting, anti-efflorescent grout for joints from 2 – 20mm) was chosen due to the grout's blend of special self-hydrating hydraulic binders that guarantees perfect colour uniformity and anti-efflorescent characteristics. By choosing to use *Ultracolor Plus*, Commercial Ceramics were guaranteed ease of use as well as the highest quality finish to complement the local black granite material. All joints were perfectly sealed using *Mapesil AC* (solvent-free acetic-crosslinking, mildew-resistant silicone sealant).

NEW PRODUCTS

MAPECEM PRONTO

Mapecem Pronto is a pre-blended, ready-to-use, quick setting and drying, controlled-shrinkage mortar with a special hydraulic binder base, admixtures and selected aggregates to be mixed with water.

- Screeds ready for foot traffic after 2-3 hours and dry after 24 hours
- Screeds on which it is possible to lay ceramic tiles after 3-4 hours
- Screeds on which it is possible to lay PVC, linoleum, timber and natural and artificial stone materials after only 24 hours
- Repairs and renovation of screeds in areas subject to continuous traffic such as in supermarkets, hospitals, airports etc.
- Internal and external application
- Controlled-shrinkage
- Quick setting and drying
- Prepare in a paddle mixer, drum mixer or forced action mixer

Available in 20kg bags – 64 bags per pallet.

Contact your Mapei Sales Representative for more information including your special pricing.

SEALANTS

MAPEFLEX PU45 FT

One component, thixotropic, easy-to-apply polyurethane-based sealant and adhesive with a high modulus of elasticity. Ideal sealant and adhesive for a multitude of applications:

- Sealing expansion and distribution joints subject to movements up to 20% of the average width of the joint
- Industrial floors subject to vehicular traffic including heavy vehicles
- Sealing cracks and around pipework
- Sealing sheet-steel sections such as flashing and guttering
- Sealing general fillet joints
- Used as an adhesive at thicknesses up to 3mm
- Ideal for bonding bathroom fittings, skirting boards, cable beads and window sills etc
- Solvent-free and paintable

Available in 300ml and 600ml cartridges in grey

TRAINING COURSES

Mapei Victoria are conducting a limited number of **Product Training** days at our premises in Port Melbourne.

The training workshops will cover:

- appropriate substrates
- preparation
- waterproofing
- tile installation
- epoxy grouting
- industry best practices
- new products
- application demonstrations

TRAINING DATE:

Wednesday 24th May

SPORT

SASSUOLO - TOP OF THE LEAGUE IN CHARITY WORK

Sassuolo has an increasing number of admirers both in Italy and abroad. But it is not just the team's results that have made the club so widely admired and popular: Mr Giorgio Squinzi's club is top of the league in charity work and wasted no time in sending aid to the people in central Italy suffering due to the bad weather and earthquakes. In December, the team donated a coach for the kids at Arquata del Tronto Football Club, a team in the Marche region. This was partly thanks to the sale of minisubscription tickets for the Europa League. Genk, the Belgian team Mr di Francesco's men faced in the group phase of this European competition, joined Sassuolo in this charity project. The young players from Arquata del Tronto had been left with no training pitch. Unfortunately, the earthquake had forced the local civil protection service to convert Arquata sports ground into a rescue centre for homeless families. But using the coach given to them by Sassuolo, the kids from Arquata were able to travel to the football pitches in Ascoli Picchio, where they could carry on with their training. Their football practice and dreams now each other continue, thanks to the love shown by Sassuolo.
