

# PLANISEAL 288

Cementitious mortar  
for waterproofing structures  
below ground level, swimming  
pools and storage tanks

# Exposed-finish waterproofing for swimming pools

**Planiseal 288** is a two-component cementitious mortar for **waterproofing** the **internal** or **external** faces of masonry and concrete **structures below ground level** (up to a **pressure** of **1.5 bar**).

**Planiseal 288** is also used to **create an exposed waterproof finish for swimming pools**, ornamental **ponds** and storage **tanks** in general.

When the two components are mixed together they form a **plastic consistency paste** suitable for application by **trowel**, **roller** or **brush** in **two criss-cross layers** to form a final total thickness of **2 mm**.

**Easy to use**, enables swimming pools and storage tanks to be created with a **natural effect finish**.

## Product pluses

**AVAILABLE IN TWO COLOURS:**  
WHITE AND GREY

**EXCELLENT ADHESION** TO VARIOUS TYPES OF SUBSTRATE: CONCRETE, CEMENTITIOUS RENDER, BRICKS AND BLOCKS

**EASY TO APPLY**

**EXTREMELY ATTRACTIVE FINISH**, PARTICULARLY THE WHITE VERSION

**PRE-DOSED KITS**

**HIGHLY PERMEABLE**  
TO WATER VAPOUR

COMPLIES WITH THE PERFORMANCE REQUIREMENTS OF EN 1504-2, **PROTECTS THE SURFACE OF CONCRETE** AND **IMPROVES ITS DURABILITY**
