

Ultralite Flex

**ONE-COMPONENT LIGHTWEIGHT
CEMENTITIOUS ADHESIVE**

**The everyday
tile
adhesive!**

Ultralite Flex

Lightweight and tough
for all your daily tiling work

What is Ultralite Flex:

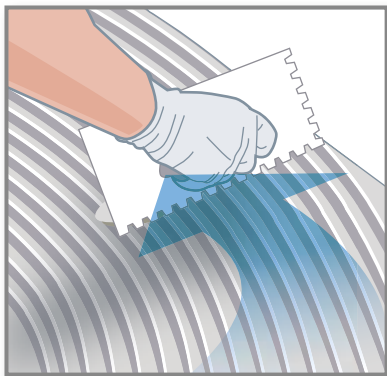

One-component, high-performance, fair deformability, lightweight cementitious adhesive with extended open time, with no vertical slip, excellent back-buttering capacities, good trowellability and very high yield.

Classified C2TE according to EN 12004 and ISO 13007-1 standards and EMICODE EC1 R Plus according to GEV.

Characteristics and advantages:

- **Easier to apply** compared with conventional adhesives.
- **Less effort required** thanks to its special formulation and the use of lightweight natural aggregates that make trowelling easier.
- **Lighter bags (15 kg)** with practical hand grips for easier transport and handling.
- **Up to 55% higher yield** compared with other adhesives with the same classification.
- **Excellent back-buttering of the tiles**, double-buttering not required.
- **Excellent adhesion** to all types of substrate normally used in the building industry.
- **Lower transport costs** - each pallet weighs just 750 kg which means more bags of product can be transported with each load.
- Thanks to its **Low Dust** technology, the formation of dust during mixing is drastically reduced.
- Available in **brilliant white** and **grey**.
- Helps earn **Leed award points**.

Easier to apply
compared with conventional adhesives

Lighter bags (15 kg) and easy

Up to 55% higher yield compared with
adhesives with the same classification

HIGHER YIELD - LOW

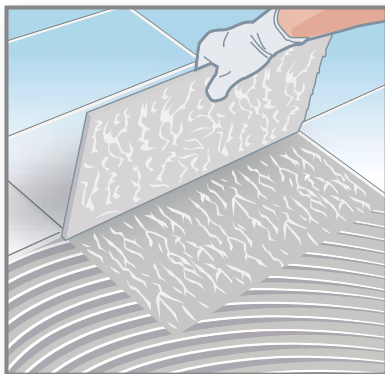

FULL
1500

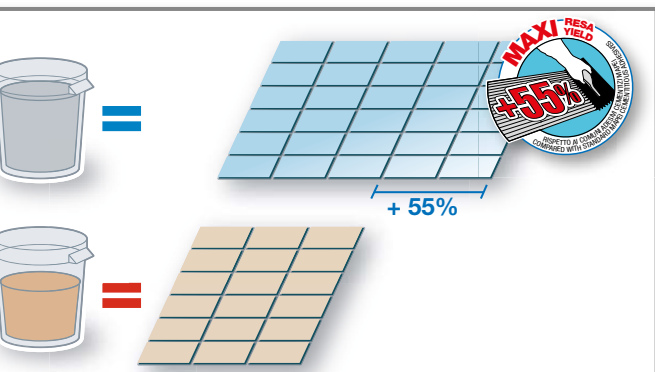

Bags of ULTRALITE FLEX: 100 off
Yield: approximately 600 m²

Easy to transport and handle
Ergonomic hand grips

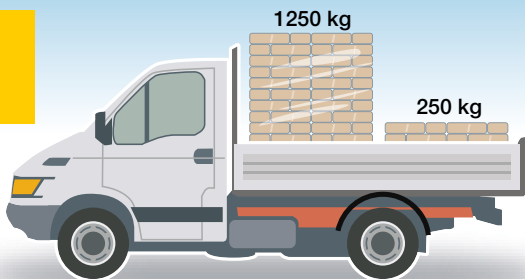

Excellent back-buttering of the tiles

REDUCE TRANSPORT COSTS

LOAD
1250 KG

Bags of CONVENTIONAL ADHESIVE: 60 off
Yield: approximately 360 m²

Why use Ultralite Flex:

- Offers **55% higher yield** compared with other adhesive of the same class; one 15 kg bag is enough to install around the same m² of tiles as a 25 kg bag of conventional adhesive.
- Suitable for **all types of ceramic**, mosaic, thin porcelain tiles (without reinforcement mesh) and dimensionally stable stone on all conventional types of substrate, by overlaying, on heated substrates and on plasterboard.
- Allows you to install on **waterproofing membranes** from the **Mapelastic** family and on **Mapegum WPS**.
