**GLAMOUR**

- Mandorla - Almond
- Blu Mare - Sea Blue
- Lime - Lime Green
I colori esposti sono indicativi e possono variare per motivi di stampa. Per una corrispondenza più accurata dei colori, fare riferimento ai campioni "Fughe Colorate" Mapei. I colori possono essere influenzati dalla superficie accostata e dalla luminosità dell'ambiente.

Due to the printing processes involved, the colours should be taken as merely indicative of the shades of the actual product. For an accurate colour representation, please refer to Mapei "Coloured Grouts" samples. Colours can be affected by the surface (where they are used) and the brightness of the environment.

Kerapoxy Design

Mapei Kerapoxy Design is a two-component, acid-resistant epoxy grout for joints over 3 mm. It is used for internal and external grouting of ceramic floor and wall tiles and stone material, that are subject to heavy traffic or excessive thermal changes. It is available in Light Gold and Silver (available in 32 colours + transparent).

Fix & Grout Brick

Two-component, decorative, translucent, acid-resistant epoxy mortar for grouting glass and external joints between different construction elements in building, mechanical engineering, ship-building, during the construction phase. It is particularly easy to apply and clean with DropEffect®, for the grouting of joints up to 6 mm (available in 15 colours).

Keracolor FF

High-performance, polymer-modified water-repellent cementitious mortar for external joints up to 20 mm, with DropEffect® and mould-resistant with Ultracolor Plus. Keracolor FF is ideal for the stuccoing of joints up to 4 mm. Keracolor FF is available in 14 colours.

MapeGlitter

Two-component, decorative, translucent, acid-resistant epoxy mortar for grouting glass and external joints between different construction elements in building, mechanical engineering, ship-building, during the construction phase. MapeGlitter can be used in combination with Kerapoxy Design and Keracolor FF to create a special aesthetic combination. It is available in Light Gold and Silver (available in 32 colours + transparent).

Mapesil LM

Silicone sealant for natural stone and ceramic tile finishes (available in 9 colours + transparent) and with Ultracolor Plus for the stuccoing of joints up to 6 mm (available in 15 colours).

Mapesil AC

Acetate gel-based silicone sealant, resistant to moulds with technology BioBlock®, for the bonding of brick slips and light weight cementitious and synthetic resin conglomerate with the simultaneous use of Fix & Grout Brick. It is ideal for the bonding of brick slips and light weight cementitious and synthetic resin conglomerate with the simultaneous use of Fix & Grout Brick. Mapesil AC is available in 13 colours.

Malta cementizia ad alte prestazioni, modificata con polimero, per la stuccatura di fughe da 2 a 20 mm, a presa ed asciugamento rapidi, idrorepellente con DropEffect® e batteriostatico, ideale per la stuccatura di fughe tra piastrelle ceramiche e mosaici (disponibile in 14 colori).

High-strength, quick-setting grey cement pozzolan mortar with very low water absorption (available in 14 colours).
Mapei offers a range of grout materials for different applications, including:

- **Coloured Grouts for Ceramic Tiles and Stone Material**: All colours are indicated and may vary due to printing reasons. For greater precision, refer to the real samples.
  
- **Adhesive Mortar in Paste Form**: High-performance, ready-to-use adhesive with DropEffect® and BioBlock® technology for grouting joints over 3 mm.
  
- **Kerapoxy**: Two-component, acid-resistant epoxy grout for joints over 3 mm, particularly easy to apply and clean.
  
- **Keracolor FF**: Fine-grained, high-performance white cementitious mortar for grouting joints up to 4 mm wide.
  
- **Ultracolor Plus**: Fast setting and drying, high performance, polymer-modified, anti-efflorescence, water repellent grout.
  
- **Mapesil AC**: Silicone sealant with acetic cross-linking, suitable for sealing construction elements in various industries (available in 34 colours + transparent).
  
- **Mapesil LM**: Mould-resistant with BioBlock® technology, solvent-free, silicone sealant with acetic cross-linking (available in 9 colours + transparent).
  
- **MapeGlitter**: Adhesive, high-performance adhesive for bonding brick slips and lightweight cementitious and synthetic resin conglomerate.
  
- **MapeJet**: Two-component, acid-resistant grey cement epoxy mortar, particularly easy to apply and suitable for grouting tile joints wider than 3 mm.
  
- **MapeKraft**: Two-component, acid-resistant, epoxy grout for joints over 3 mm, particularly easy to apply and clean.

These materials are certified by the University of Modena (Italy) according to ISO 22196:2007 standards as protected from the formation and proliferation of microorganisms.
