

MONOLASTIC

One-component elastic
cementitious waterproofer for
balconies, terraces, bathrooms,
showers and swimming pools

One-component waterproofing

Monolastic is a **one-component flexible cementitious membrane** for **waterproofing balconies** and **terraces**, as well as **bathrooms, showers** and **swimming pools**, before laying ceramic covering according to EN 14891 CM01P. It is also suitable for protecting concrete according to EN 1504-2.

Monolastic is applied in thin layers and, thanks to its **excellent adhesion** to a wide range of **substrates** and its **high breathability**, it is highly versatile when used on new builds and in renovation work on existing structures. The mortar is prepared by mixing the waterproof powder with water to create a **fluid rather than liquid mix**, making its application with a trowel really simple and quick.

To obtain a **correct waterproofing system**, it is recommended to also use appropriate accessory items (reinforcement, tape and end profiles) in order to create a continuous and longer lasting system.

CO₂ emissions measured throughout the life cycle of products from the Zero line in 2023 using Life Cycle Assessment (LCA) methodology, verified and certified with EPDs, have been offset through the acquisition of certified carbon credits in support of renewable energy and forestry protection projects. A commitment to the planet, to people and to biodiversity. For more details on how emissions are calculated and on climate mitigation projects financed through certified carbon credits, visit the webpage zero.mapei.com.

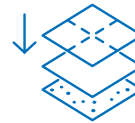

Advantages of the product

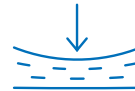

COMPLETE WATERTIGHTNESS
OF BOTH NEW AND EXISTING SUBSTRATES

EXCELLENT ADHESION
TO SUBSTRATES

CERAMIC COVERING
MAY BE APPLIED DIRECTLY
ON THE WATERPROOFING LAYER

HIGH CRACK-BRIDGING CAPACITY
AT LOW TEMPERATURES

LOW THICKNESS
PERFECT FOR RENOVATION WORKS
EVEN ON EXISTING FLOORING

MEMBRANE WITH CE MARKING
ACCORDING TO 1504-2
AND 14891 STANDARDS

EPD CERTIFICATION

PRODUCT WITH CO₂ EMISSIONS
FULLY OFFSET
