

ULTRACARE RAIN PROTECTOR W and ULTRACARE RAIN PROTECTOR S

Water-repellent
anti-infiltration treatment
for balconies and terraces

UltraCare Rain Protector W

Protective water-repellent treatment with high contact angle, solvent-free, for the temporary protection of exterior flooring in contact with rainwater. Ideal for temporary protection of terraces, balconies and horizontal surfaces exposed to weather.

ADVANTAGES

- Product with **very low emissions** of VOC (Volatile Organic Compounds)
- High penetrating power
- Surface **water-repellent effect** also in case of cracks **up to 1 mm**
- Does not form a film and **does not alter** the natural breathability of porous materials

MAIN FEATURES

UV RESISTANT

HIGH PERFORMANCE

READY TO USE

QUICK AND SIMPLE
APPLICATION

HIGH CONTACT ANGLE

UltraCare Rain Protector S

Solvent-based protective and consolidating water-repellent treatment with very high contact angle, for temporary protection of exterior flooring in contact with rainwater. The product impregnates and consolidates cementitious grouts' surface and cracks in the flooring (up to 1 mm).

ADVANTAGES

- High penetrating power
- **Very high contact angle**
- **Excellent surface water-repellent effect** also in case of cracks **up to 1 mm**
- Does not form a film and **does not alter** the natural breathability of porous materials

HIGH CONTACT ANGLE

Water-repellent anti-infiltration treatment for balconies and terraces

From MAPEI Research and Development, the new **water-repellent** and **consolidating** treatments with **high contact angle**, for the protection of outdoor floors subject to contact with rainwater. **Ideal for protection** of terraces, balconies, horizontal surfaces exposed to the weather. Also suitable for **cracked surfaces up to 1 mm**, they do not form a film and **do not alter** the natural breathability or slipperiness of porous materials. They protect porcelain tiles, ceramic, natural stone, Klinker, Terracotta and cement. The treatment penetrates in grouts and cracks with a consolidating effect, thus **preventing water infiltration** and subsequent mechanical or biological deterioration.

Available both in solvent-base version **UltraCare Rain Protector S** and in water-base version **UltraCare Rain Protector W**, with **EC1 Plus** certification as product with **very low emission of volatile organic compounds**.
