

MAPEI MARINE IS TAKING PART AT METSTRADE 2021 IN AMSTERDAM FROM 16TH TO 18TH NOVEMBER

From stand 07.220 in the SuperYacht Pavilion Mapei Marine will be presenting their range of products

Milan, 12th November 2021 – From 16th to 18th November, RAI Amsterdam is the venue hosting the METSTRADE 2021 international trade exhibition. And this year the global event aimed at experts from the nautical sector will be taking on a hybrid form. In fact, apart from the exhibition itself, the entire three-day show will be streamed live.

Mapei Marine will be there on stand 07.220 in the SuperYacht Pavilion to present their portfolio of products and solutions with particularly stunning effects dedicated to the high-end shipbuilding industry. Thanks to intense research work carried out in the Mapei laboratories, Mapei Marine has managed to combine beauty and functionality to propose innovative solutions with cutting-edge technology.

And here are the solutions on display at Metstrade:

MAPEDECK TERRAZZO: a system to recreate Venetian terrazzo flooring, in such high demand to embellish internal settings. Applied over a special resin sublayer by Mapei Marine to level off the installation surface, it has excellent resistance to wear and is easy to clean using products from the Mapei Ultracare line.

MAPEDECK MIRUM is used as a final coating to form highly attractive finishes on internal and external horizontal and vertical surfaces on ships and yachts. And it is available in an infinite array of textured finishes: from strictly minimalist to the most extreme marbled effect, to recreate materials of the highest quality. Mapedeck Mirum is a two-component, aliphatic polyurethane resin-based formula according to a formula developed in the MAPEI R&D laboratories.

MAPEDECK MONODESIGN is ideal for creating decorative coatings with a marbled effect finish on internal floors and walls. Extremely versatile, very easy to apply and non-yellowing, it has excellent resistance to abrasion which makes it suitable for use on floors exposed to intense levels of foot traffic. It is available in a wide range of colours which may be further enhanced by a coating of Mapedeck Finish HDT, the ideal product to create decorative finishes of the highest quality.

MAPEDECK TEAK DESIGN is a coloured, seamless final coating for internal and external decks on ships. It may even be used to replace wood in areas where it is impossible to be applied and provides safety and high performance properties, as well as a beautifully refined finish. Mapedeck Teak Design is a two-component, aliphatic polyurethane resin-based formula according to a formula developed in the Mapei R&D laboratories and has been specifically created to form the textures and shades characteristic of teak.

Mapei

Founded in 1937 in Milan, Mapei is one of the world's leading producers of chemical products for use in the building industry and has taken part in the construction of the most important architectural works and infrastructure projects at a global level. With 89 subsidiaries located in 57 countries and 81 production facilities operating in 36 countries, the Group has more than 10,600 employees around the world. In 2020, Mapei Group registered a consolidated turnover of 2.8 billion Euros. The foundations for the success of the company are specialisation, internationalisation, research & development and sustainability.
