

## **MAPEI INAUGURATES NEW HEADQUARTERS IN THE CZECH REPUBLIC**

New offices and warehouses to better serve the local market  
and promote sustainable construction

Milan, 3 december 2024 - Mapei, leader in the production of chemical products for the building industry, has inaugurated its new headquarters in the Czech Republic, in Olomouc. A strategic investment to meet the needs of a continuously expanding reality and to strengthen the connection with the territory.

Mapei has been present in the Czech Republic since 1991 with a facility in Olomouc. Over the years, this original plant no longer met the needs of a rapidly growing company, leading to the decision to move the offices and warehouse to newly built facilities in the VPG Park, also in Olomouc. Strategically located near the junction of the D46 and D35 motorways, the new premises offer improved accessibility and logistics.

The new structure, built with Mapei's emissions-offset products, is a real example of the advanced and sustainable technologies offered by the company. Housing state-of-the-art warehouses, offices and training rooms, it will continue to offer innovative solutions and high-quality services to customers and industry professionals.

*"The Czech Republic, with its central position in Europe, is an important market for Mapei,"* comments Veronica Squinzi, CEO of Mapei, *"where we have contributed to numerous iconic projects such as the restoration of the Charles Bridge or the construction of the O<sub>2</sub> Arena in Prague. This new investment demonstrates our desire to grow responsibly, contributing to the development of the country, driven by our passion for innovation, quality and sustainability".*

*"Mapei's new headquarters in Olomouc guarantees better accessibility and logistics, as well as a more modern space to better serve our customers and offer a welcoming working environment to our employees,"* adds Marco Squinzi, Mapei CEO. *"Thanks to the use of our products with fully offset CO<sub>2</sub> emissions, it is also a real example of how we contribute to sustainability in construction, with solutions designed to reduce the impact through quality and durability".*

With over 30 years of presence in the Czech Republic, Mapei has contributed to the development of the local market not only through the offer of high quality products, but also through training programs and technical support to local professionals. The new location represents a new chapter for the company, which intends to continue growing and supporting the local community with innovation and responsibility.

### **Mapei**

*Founded in 1937 in Milan, Mapei is now one of the world's leading manufacturers of chemical products for the building industry and has contributed to the construction of some of the most important architectural and infrastructural works worldwide. With 96 subsidiaries operating in 57 countries and 93 manufacturing plants in 36 different nations, the Group employs about 12,500 staff worldwide. The Mapei Group's consolidated turnover amounted to €4.2 billion in 2023. The foundations for the success of the company are specialisation, internationalisation, research & development and sustainability.*
