

MAPEI TECHNOLOGY FOR THE PETRONAS SEPANG INTERNATIONAL CIRCUIT

Kerbs and run-off areas created for the Malaysian Grand Prix
using Mapecoat TNS Race Track

Milan, 10th November 2023 – Mapei's growth in the world of motor sports continues by participating in the preparation of the Petronas Sepang International Circuit for the Malaysian Motorsports. Famous for being the widest circuit of the MotoGP™ Championship, the Petronas Sepang International Circuit is characterised by a series of sweeping corners and two long straights.

In preparation for the MotoGP™, the kerbs and run-off areas along the 5,543 metre long circuit were coated with Mapecoat TNS Race Track, a waterborne rapid film-forming acrylic colored coating textured with selected fillers.

Thanks to Mapei technology, surfaces treated with this product are more durable and more resistant to slip and will be able to maintain their surface roughness over time, even in wet conditions.

The special formulation of Mapecoat TNS Race Track complies with all the test and safety requirements of FIA (Federation Internationale de l'Automobile) and FIM (Fédération Internationale de Motocyclisme) standards for products used for road markings at race circuits. The ColorMap® automatic colouring system and the extensive range of colours available enable any colour combination to be created.

Mapecoat TNS Race Track has already been used on previous occasions in the racetracks for important international car races, such as the Baku City Circuit.

Mapei

Founded in 1937 in Milan, Mapei is now one of the world's leading manufacturers of chemical products for the building industry and has contributed to the construction of some of the most important architectural and infrastructural works worldwide. With 102 subsidiaries operating in 57 countries and 90 manufacturing plants in 35 different nations, the Group employs more than 11,900 staff worldwide. The Mapei Group's consolidated revenue amounted to almost €4 billion in 2022. The foundations for the success of the company are specialisation, internationalisation, research & development and sustainability. www.mapei.com
