**WHERE TO USE**

- **Anti-rust treatment** to ensure protection and durability to metal substrates in exterior, before painting with Dursilac water-based acrylic urethane enamel paints.

- **Adhesion promoter** and base layer to even out new or painted metal substrates, prior to the application of Dursilac Gloss, Satin or Matt enamel paints.

- **Touch-up of rusted areas** on iron or metal surfaces.

**Some application examples**

- Anti-rust treatment of outdoor new or painted metal surfaces, such as gates, railings, iron grilles, metal carpentry in general.

- Anti-rust base layer and adhesion promoter for the preparation of various metal items to be painted, such as new or painted metal garden furniture, racks, etc.

- Precautionary treatment against rust formation for all metal surfaces.

**TECHNICAL CHARACTERISTICS**

Dursilac No Rust is a synthetic anti-rust metal primer, based on iron oxides and zinc phosphate, grey in colour.

Dursilac No Rust has a quick drying and a good corrosion inhibition.

Dursilac No Rust is a one-component product, easy to use, formulated for the protection and safekeeping of outdoor metal surfaces.

Dursilac No Rust adheres perfectly to the various types of metals and has a very high hiding power. These characteristics ease the preparation of the substrate, covering small imperfections to reach an even appearance.

Dursilac No Rust preserves metal surfaces from the formation of rust and makes the substrates uniform before the final top coat with Dursilac water-based acrylic urethane enamel paint, available in Gloss, Satin and Matt finish.

**APPLICATION PROCEDURE**

**Preparation of the substrate**

New unpainted metal surfaces: remove completely all existing rust and millscale by brush or sandpapering. Carefully clean and degrease the surface with a suitable thinner.

Previously painted metal surfaces: carefully clean and sandpaper the substrate to remove rust and existing layers of loose or flaking paint. Dust and degrease the surface with a suitable thinner.

**Preparation of the product**

Dilute Dursilac No Rust with synthetic thinner or white spirit up to max. 10% by volume, according to the application tool to be used, the ambient conditions and the type of substrate. Stir the product thoroughly. For the preparation of partial quantities, it is recommended to accurately stir Dursilac No Rust, as it is, before pouring the material from the original metal tin.

### FINAL PERFORMANCE

| VOC content of ready-mixed product (grey) (European Directive 2004/42/EC) (g/l): | ≤ 450 (category BSA/i: 500 g/l [2010]) |

---

**Application of the product**

Apply Dursilac No Rust by short pile roller, brush or spray on the perfectly clean, dry and cohesive surface. Touch-up rusted areas with Dursilac No Rust; let it dry and apply a uniform layer of product on the entire surface. The application cycle requires one or two coats of Dursilac No Rust metal primer at 12 hours between coats, in normal conditions of humidity and temperature, and in any case when the previous layer is completely dry. Complete the protection and decoration of the surface with two coats of Dursilac, water based acrylic urethane enamel paint, in the desired colour and finish (Gloss, Satin, Matt).

**RECOMMENDATIONS**

- Do not apply when rain is imminent, with windy weather or under direct sunlight.
- Do not apply when relative humidity is above 80%.
- Do not apply on damp surfaces.
- Be careful to respect the drying time to avoid wrinkles appearing on the top finish coat.
- Do not use indoor.

**Cleaning**

Brushes, rollers and all equipment used for the application can be cleaned with white spirit or synthetic thinner before drying of Dursilac No Rust.

**COVERAGE**

Coverage is highly depending on the nature
and porosity of the substrate on the type of the tool used for the application. In normal conditions Dursilac No Rust will cover about 6-8 m²/litre, per coat.

PACKAGING
Dursilac No Rust is supplied in metal tins of 0.75 and 2.5 litres.

STORAGE
24 months in a dry place, away from heat sources at temperature between +5°C and +30°C.

SAFETY INSTRUCTIONS FOR PREPARATION AND APPLICATION
Dursilac No Rust is harmful and inflammable. Keep away from flames and sparks, do not smoke, avoid the accumulation of electrostatic charges and use in well ventilated areas. During use wear protective gloves and goggles and take the usual precautions for the handling of chemicals. If the product comes in contact with the eyes or skin, wash immediately with plenty of water and seek medical attention. Furthermore, Dursilac No Rust is hazardous for aquatic life. Do not dispose of the product in the environment.
