

BRING COLOUR TO YOUR COURT WITH MAPECOAT TNS COLORIZER

Limitless personalisation with this innovative online tool by Mapei

Milano, 29th June 2021 – Would you like to play on a green tennis court like the one at Wimbledon? Or a blue one like at the Australia Open? Or even powder pink to really break with tradition?

Thanks to the online tool [MAPECOAT TNS COLORIZER](#), available on the Mapei website, you can create your own playing surface to simulate the colours typically used in arenas that host the most important international tournaments, or even create truly original patterns and combinations. In fact, with this new free tool from the Mapei Sports System Technology division, you can now personalise the colour scheme for your sports surface without limits: the playing area, the borders around the court, even the lines.

Designed to simplify the work of architects, engineers and designers, and to give the managers of sports facilities an image of how the various combinations will look, the tool is fun to use and gives all sports fans the chance to design their very own sports surface according to personal taste.

MAPECOAT TNS COLORIZER is an intuitive tool and isn't limited to just tennis: choose from 13 different sports, such as tennis, basketball, volleyball, skating, paddle-ball and athletics, and 36 different colours. Choose from Melbourne Blue, Swiss Red, London Green, Paris Red and Sydney Blue, or even more unusual colours such as Pink or Powder Pink, Sea Blue or Forest Green.

What is more, if you wish to personalise your colour scheme, you can also use the ColorMap automatic colouring system.

Thanks to the overhead and 3-D views available, you also get an overall view of the court from many different angles and its general context within a typical setting.

For more inspiration you can also take a look at some of our most recent projects, such as the Lubrano Tennis Academy, Gruppo Sportivo Scaltenigo GSS, the We PlayGround Together basketball court, the Ottavio Bottecchia Velodrome or the Waverley District Netball Association.

MAPECOAT TNS SYSTEM is a reference for architects, designers, engineers and those who run and manage sports facilities and clubs. The system consists of cutting-edge solutions to create indoor and outdoor sports surfaces, either brand new or to recoat existing surfaces, and may even be used as a permanent solution or just for temporary events. Perfect surfaces from both a performance and safety perspective combined with comfort and aesthetics, for long-lasting surfaces resistant to all weather conditions.

Mapei

Founded in 1937 in Milan, Mapei is now one of the world's leading manufacturers of chemical products for the building industry and has contributed to the construction of some of the most important architectural and infrastructural works worldwide. With 90 subsidiaries operating in 57 countries and 83 manufacturing plants in 36 different nations, the Group employs over 10,500 staff worldwide. In 2019 Mapei had a consolidated turnover of €2.8 billion. The foundations for the success of the company are specialisation, internationalisation, research & development and sustainability.
