

INDUSTRIAL COATINGS

INCLUDED PRODUCTS

Featured systems:

- Mapefloor EP W
- Mapefloor EP C
- Mapefloor EP SL
- Mapefloor EP SL S
- Mapefloor EP Compact
- Mapefloor EP Decor S
- Mapefloor EP AGRI
- Mapefloor PU SL
- Mapefloor PU SL S
- Rescryn

For additional information, please refer to the latest version of system and technical data sheet for each product.

WASTEMANAGEMENT

Non-cured product is classified as dangerous waste. Cured or dried product should be treated alongside other construction waste. Make contact with your local waste management facility.

ENVIRONMENTAL INFORMATION

See safety datasheet for the featured product.

MAINTENANCE

Surfaces should be cleaned when required. All final treatment will with time be subject to abrasion, reduction of gloss etc. dependent on the use. Changes of colours may occur. Damages should be repaired as soon as possible.

CLEANING

Floors can be cleaned either by hand, with high pressure cleaners or machine dependent on the construction. Use **Mapefloor Cleaner ED** (1- 3 % in water) as a cleaning agent. Other weak alkaline cleaning agents may be used but we recommend cleaning a trial area to evaluate whether the agent is suitable for the flooring. If using a machine soft pads/brushes should be used to avoid abrasion.

REMOVING OF RUBBERMARKS ETC.

Removing of rubber marks etc. must normally be done with special cleaning agents. There should be done test to avoid degeneration of gloss.

BESKYTTELSE MED POLISH/WAX

To ease cleaning and to protect your flooring, polish or wax can be used on floors that have not been sprinkled with sand. Start with removing all trace of old polish or wax with **Mapefloor Wax Remover**. Then apply **Mapelux Lucida** (glossy) or **Mapelux Opaca** (matt) in accordance with each products datasheet.

REPAIRING DAMAGES

Any damage should always be repaired using the same material and system as originally used. Always contact the contractor before doing repairs.
