

Mapecoat TNS System

Use **Mapecoat TNS System** to make:

- Tennis courts
- Basketball courts
- Volleyball courts
- 5-a-side football pitches
- Handball courts
- Skating rinks
- Cycle tracks
- Recreation parks
- Urban features
- Car-parks in shopping centres to differentiate areas for pedestrian use from the areas for car parking

Mapecoat TNS System

Mapecoat TNS System is a coating and finishing system made from acrylic resin in water dispersion and selected fillers with high resistance to wear, UV rays and various weather conditions. It may be used to form flooring for indoor and outdoor sports and multi-purpose areas.

Sports surfaces made using **Mapecoat TNS System** are relatively elastic, offer excellent playing comfort and have excellent technical performance characteristics, such as the bounce of the ball, sudden changes in direction while running and a high degree of safety, and provides an excellent balance between stability and sliding for those who use such surfaces.

Mapecoat TNS System is made up of:

Mapecoat TNS White Base Coat: semi-elastic acrylic resin filler paste in water dispersion with selected fillers for undercoating.

It is used to prepare and even out the surface of substrates before applying coloured finishing coats of **Mapecoat TNS Finish** and **Mapecoat TNS Urban**.

Mapecoat TNS Grey Base Coat: elastic acrylic resin coating and filler paste in water dispersion with SBR granules and selected fillers, used to prepare and level the surface of substrates.

Mapecoat TNS Grey Base Coat is also used as an elastic undercoat before applying coloured finishing coats of **Mapecoat TNS Finish**.

Mapecoat TNS Finish: elastic acrylic resin coating paste in water dispersion with selected inerts for finishing the surface of multi-discipline sports pitches. It is available in the 20 colours shown on the colour chart or according to individual samples upon request.

Mapecoat TNS Urban: acrylic resin-based coloured coating in water dispersion with selected fillers, for coating cycle tracks, footpaths and urban features. It is available in the 20 colours shown on the colour chart or according to individual samples upon request.

Mapecoat TNS Line: elastic acrylic resin paint in water dispersion with selected fillers for marking out sports pitches and play areas.

The following **Mapecoat TNS System** configurations are available:

Mapecoat TNS Professional: multi-layered acrylic resin system in water dispersion for professional indoor and outdoor tennis courts.

Mapecoat TNS Cushion: medium-elasticity multi-layered acrylic resin system in water dispersion for professional indoor and outdoor tennis courts.

Mapecoat TNS Comfort: high-elasticity multi-layered acrylic resin system in water dispersion used in combination with granular rubber matting for professional indoor and outdoor tennis courts.

Mapecoat TNS Multisport Professional: multi-layered acrylic resin system in water dispersion for indoor and outdoor multi-purpose sports pitches.

Mapecoat TNS Multisport Comfort: high-elasticity multi-layered acrylic resin system in water dispersion used in combination with granular rubber matting for indoor and outdoor multi-purpose sports courts.

Mapecoat TNS Urban: acrylic resin-based coating multi-layered system in water dispersion for coating cycle tracks or urban features.
