MAPEI

Mapeguard WP System

Waterproofing and anti-fracture membrane alkali resistant under ceramic and natural stone tiles.
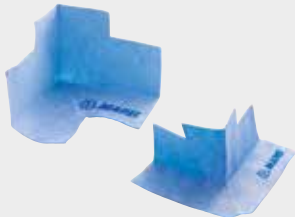

Mapeguard WP 200

- Waterproofing and anti-fracture membrane, made of soft polyethylene, for direct application under ceramic and natural stone tiles with thin-set mortar.
- For baths, showers, wet rooms, etc., that have to be tiled with ceramic tiles, marble, natural stones, etc.

Mapeguard ST

- Waterproofed sealing tapes membrane rolls to seal corners and junctions between **Mapeguard WP 200** sheets.
- For walls and floors.

Mapeguard IC and Mapeguard EC

- Special waterproofing pieces for internal and external corners.

Mapeguard PC

- Flexible gaskets for waterproofing around pipes suitable for several pipe diameters.

Mapeguard WP Adhesive

- Two component, rapid set elastic cementitious adhesive for bonding and sealing overlaps of **Mapeguard WP 200** and relative accessories.

1 Cementitious screed	**4** Waterproofing sealing tape **Mapeguard ST**	**6** Two-component, rapid-set cementitious adhesive **Mapeguard WP Adhesive**	**8** Glass mosaic
2 Cementitious tile adhesive **Ultralite S1 Flex**	**5** Waterproofing internal corner **Mapeguard IC**		**9** Epoxy grout **Kerapoxy Easy Design**
3 Alkali-resistant waterproofing and anti-fracture membrane **Mapeguard WP 200**		**7** Cementitious tile adhesive **Ultralite S1 Flex**	**10** Elastic sealant **Mapesil AC**
