# Ultracoat Soft Touch

---

**Ultracoat Soft Touch Base, one-component, water-based primer for preparing wooden floors before applying Ultracoat Soft Touch Finish. Product with low emission of volatile organic compounds GEV EMICODE EC1 and no NMP**

## WHERE TO USE

Preparation of solid and engineered unfinished wooden floors and floors requiring repair.

## TECHNICAL CHARACTERISTICS

**Ultracoat Soft Touch Base** is a one-component, rapid drying, water-based primer characterized by its excellent covering properties, rapid drying, ease of buffing and ease of application which reduces the problem of overlapping.

***Ultracoat Soft Touch Base +  
Ultracoat Soft Touch Finish***

---

## System for the protection of wooden flooring

---

**Ultracoat Soft Touch Finish, two-component, water-based, 100% polyurethane varnish with no NMP and with low emission of volatile organic compounds, GEV EMI CODE EC1 R. Natural, soft finishing for protecting wooden floors in residential and commercial environments**

## **WHERE TO USE**

Highly protective, wear and abrasion resistant finish for solid or engineered unfinished wooden floors requiring repair in residential or commercial environments, including those subjected to high level of foot traffic.

## **TECHNICAL CHARACTERISTICS**

**Ultracoat Soft Touch Finish** is two-component, water-based, 100% polyurethane, aliphatic (non yellowing) varnish, with high resistance to abrasion and to scuff marks from rubber-soled shoes.

It also gives timber floors an attractive “natural wood” finish which is soft to the touch: all the floors treated with this varnish have a natural finish similar to impregnation products such as oil or wax.
