

## SEALING NATURAL STONE

## INCLUDED PRODUCTS

- Elementfog Tix
- Mapestone-system
- Skiferfug

For additional information, please refer to the latest version of system and technical data sheet for each product.

## PRODUCER

Mapei AS  
post@mapei.no  
[www.mapei.no](http://www.mapei.no)

## WASTE MANAGEMENT

Non-cured product is classified as hazardous waste. Cured or dried product should be disposed of in the same manner as other construction waste. Contact your local waste management facility.

## ENVIRONMENTAL INFORMATION

See safety datasheet for the featured product.

## MAINTENANCE

Surfaces should be cleaned when required. Any impregnation will gradually break down and may have to be renewed. Any damage should be repaired as soon as possible.

## CLEANING

Floors can be cleaned either by hand or with machine dependent on the construction. Use weak alkaline cleaning agents, but we recommended cleaning a trial area to evaluate whether the agent is suitable for the flooring. Pressure washers should be used with care

## PROTECTING SEAMS AND SURFACE

In order to protect seams and limit water intrusion, **Planiseal WR 100** waterproofing treatment can be applied to the surface. This treatment is virtually colourless and will protect against decomposition and increase frost resistance, while remaining permeable. It should be applied in accordance with the instructions on the technical data sheet. Always protect glass and other details when treating.

## REPAIRING DAMAGES

Before repairing damage, the cause of the damage should be identified. Any damage should always be repaired using the same material and system as originally used. Always contact the contractor before doing repairs.
