WASTE MANAGEMENT

Non-cured product is classified as hazardous waste. Cured or dried product should be disposed of in the same manner as other construction waste. Contact your local waste management facility.

ENVIRONMENTAL INFORMATION

See safety datasheet for the featured product.

MAINTENANCE

Surfaces should be cleaned when required. All final treatment will with time be subject to abrasion, reduction of gloss etc. dependent on the use. Changes of colours may occur – both from exposure to sunlight and different fluids. Any damages should be repaired as soon as possible.

CLEANING

Floors can be cleaned either by hand or with pressure cleaners. Use **Mapefloor Cleaner ED** (1- 3 % in water) as a cleaning agent. Other weak alkaline cleaning agents may be used but we recommend cleaning a trial area to evaluate whether the agent is suitable for the flooring.

REPAIRING DAMAGES

Before repairing damages the cause of the damage should be identified. Any damage should always be repaired using the same material and system as originally used. Always contact the contractor before doing repairs.
