

# WATER TREATMENT PLANTS, DRINKING WATER AND POOLS

## INCLUDED PRODUCTS

Featured systems:

- Mapecoat EP AQUA
- Mapecoat EP SEW
- Mapecoat EP Pool
- Purtop 1000
- Rescryn Tank

For additional information, please refer to the latest version of system and technical data sheet for each product.

## PRODUCER

Mapei AS  
 post@mapei.no  
[www.mapei.no](http://www.mapei.no)

## WASTE MANAGEMENT

Non-cured product is classified as hazardous waste. Cured or dried product should be disposed of in the same manner as other construction waste. Contact your local waste management facility.

## ENVIRONMENTAL INFORMATION

See safety data sheet for the featured product.

## MAINTENANCE

Surfaces should be cleaned when required. All final treatment will with time be subject to abrasion, reduction of gloss, etc. dependent on the use. Changes of colours may occur. Any damage should be repaired as soon as possible.

## CLEANING

Surfaces are usually cleaned using a pressure washer (max. 120 bar, with the nozzle at least 20 cm from the surface). Most types of commercial detergents can be used, but if using very alkaline (pH > 12) or acidic products with a long working time, or detergents containing organic solvents, carry out a test first. Disinfectants can normally be used. Detergents and disinfectants can both cause discolouration of the surface.

Detergents must not be allowed to dry on the surface, but should be rinsed off using clean water.

## TEMPERATURE RESISTANCE

For these systems the temperature resistance is approximately 60-70 °C. Rapid heating and/or temperature shock may cause damages. High temperatures combined with chemical loads may cause damage to the coating, unless otherwise is documented.

## REPAIRING DAMAGES

Any damage should always be repaired using the same material and system as originally used. Always contact the contractor before doing repairs.
