WASTE MANAGMENT
Non-cured product is classified as hazardous waste. Cured or dried product should be disposed of in the same manner as other construction waste. Contact your local waste management facility.

ENVIROMENTAL INFORMATION
See safety datasheet for the featured product

MAINTENANCE
Surfaces should be cleaned when required. All final treatment will with time be subject to abrasion, reduction of gloss etc. dependent on the use. Changes of colours may occur. Any damages should be repaired as soon as possible.

CLEANING
Floors can be cleaned either by hand or with machine dependent on the construction. Use **Mapefloor Cleaner ED** (1- 3 % in water) as a cleaning agent. Other weak alkaline cleaning agents may be used but we recommend cleaning a trial area to evaluate whether the agent is suitable for the flooring. If using a machine soft pads/brushes should be used to avoid abrasion.

REMOVING OF RUBBERMARKS ETC.
Removing of rubber marks etc. must normally be done with special cleaning agents. There should be done test to avoid degeneration of gloss.

PROTECTION WITH POLISH/WAX
To ease cleaning and to protect your flooring, polish or wax can be used on floors that have not been sprinkled with sand. Start with removing all trace of old polish or wax with **Mapefloor Wax Remover**. Then apply **Mapelux Lucida** (glossy) or **Mapelux Opaca** (matt) in accordance with each products datasheet.

REPAIRING DAMAGES
Before repairing damages the cause of the damage should be identified. Any damage should always be repaired using the same material and system as originally used. Always contact the contractor before doing repairs.
