**COMPLEMENTARY
PROFILES
AND TRIMS**

A WORLDWIDE LEADER

Originally established in 1937, today MAPEI is a privately owned global corporation headquartered in Milan, Italy, with 102 subsidiaries in 57 countries and 90 plants in 35 nations. The company specializes in manufacturing chemical products for building, including waterproofing products, specialty mortars and admixtures for concrete, products to restore historic buildings, and decorative and protective coatings for concrete surfaces. In addition, MAPEI is the world leader in the manufacturing of mortars, grouts, adhesives and complementary products for installing all types of floor and wall coverings. MAPEI Group chose Canada for its first steps away from home, opening the Laval, Québec, plant in 1978 as MAPEI Inc. MAPEI's Canadian footprint currently spans over 4,600 km, with production facilities in Québec, Ontario and British Columbia and a distribution center in Alberta.

HOW TO ORDER

First, choose the **product name** as listed in the Table of Contents (for example, "Diaplas Regular Rounded").

Then, determine the following elements:

- The desired finish (if applicable)
- The size

Finally, when placing the order, use the letters "DPL" followed by the product's corresponding **5- to 9-character alphanumeric code**.

Contact your local MAPEI distributor to place orders and for further information, visit www.mapei.com.

For pricing, shipping terms, and terms and conditions of sale, please refer to our digital catalog/Price list at www.mapei.com.

SUPERIOR PRODUCTS

A Complete Range of Products

MAPEI produces the most innovative products for the construction market. More than 7,000 products globally (adhesives, sealants, mortars, admixtures, latex, etc.) are manufactured in MAPEI's plants, which produce the world's most complete range of building products. Diversified, high-quality chemical products – from powdered adhesives, to liquid and paste products, to polymers – are created to meet the needs of more than 70,000 customers around the world.

Quality Control

MAPEI is an ISO 9001:2015 certified company. Its products are produced according to exacting standards, strictly adhering to process and procedural guidelines with documented compliance. This rigid production format is vigilantly followed to ensure that every product is produced uniformly from batch to batch.

PROFESSIONAL SUPPORT NETWORK

Knowledgeable Sales Force

MAPEI offers the largest, most highly trained sales force within the industry to serve your needs for product application/installation recommendations. Its sales representatives are focused on supporting you with product knowledge, product demonstrations, product information, marketing support materials and other relevant tools to help you generate sales.

Technical Expertise

An in-house Technical Services Call Center responds to customers' telephone inquiries with answers to installation challenges in real time. In addition, MAPEI can offer field support for job startups, product training and on-site problem resolution.

Customer Service Plus

MAPEI's standards for customer service are best-in-class. Our leadership includes such service innovations as:

- Customer-friendly, efficient processes
- One-call resolution
- Employee commitment to effective customer dialog

Diaplas™
Profiles and Trims

Innovative Research & Development

We have always been highly committed to this sector. Our research scientists work within a global network comprising 32 centers, with our Corporate Research Centre in Milan acting as a hub to coordinate the activities of all the other centers and as a central analysis laboratory. The United States has four centers, and Canada has one. All equipped with cutting-edge equipment, the centers collaborate continuously with universities as well as scientific and industrial research institutes.

The research and development laboratories also provide support for our Technical Services Division to help provide solutions for even the most complex requests from our clients. Working alongside these centers are our quality-control laboratories, which are present in all the MAPEI Group's production facilities.

Best-BackedSM Warranty Program

To bring it all together, MAPEI complements the industry's best products with simple, easy-to-understand requirements for a variety of warranty options.

Diaplas Economic Rounded is used for outside corners of tiles to complete the appearance of wall coverings, flooring, steps, bathtubs, etc., at a fraction of the price of the regular satin anodized rounded profiles. This extrusion has been designed thinner than our regular rounded range to reduce its cost.

Diaplas™ Regular Rounded

SHOWN IN SATIN ANODIZED

Coming in really handy when renovating, or working on any other ceramic tile installations project, Diaplas Regular Rounded is conceived to realize a bullnose effect between a ceramic surface and another surface at a lower level. These quarter-circle trims are an outstanding protective and decorative edge for wall and countertop tile applications.

SHOWN IN SATIN ANODIZED

Diaplas Regular L-Shaped is an aluminum tile trim used to protect and embellish any angle or ending of ceramic tile lay-outs where tile edges are not secured by grout joints, and where a professional and luxury finish is desired. This profile prevents tile edges from chipping while providing a finished, gapless edge for other flooring materials.

Diaplas Flexible L-Shaped is a bendable profile conceived to complement the creativity of designers and architects. This profile supports all kinds of shapes for audacious ceramic tile layouts, providing decorative joints between floorings of different materials, rounded and spiral edges, and other sophisticated ideas.

The moulding's elongated and serrated base allows it to be easily and securely affixed to the substrate, making it the ideal choice for installations with difficult curves and creative designs.

Diaplas T-Shaped is used to create a joint cover between two floor surfaces of the same height already installed where expansion is expected. The curved end on each side of this profile has been designed to create a transition between the two floors if they are not perfectly the same height. This avoids creating an empty space between the trim and the floor. Often used to separate two rooms or to delimit two floors – for example: hardwood and ceramic tile.

Diaplas T-Shaped for Vinyl is used to create a joint cover between two floor surfaces of the same height (already installed), where expansion is expected. The curved end on each side of this profile has been designed to create a transition between the two floors if they are not perfectly the same height. This avoids creating an empty space between the trim and the floor. Often used to separate two rooms or to delimit two floors and specially created for vinyl floors based on its central leg which is very short, allowing it to work with very thin surfaces.

Coming in really handy when renovating, Diaplas Transition is conceived to realize a slope of 30 degrees between a ceramic surface and another surface of a lower level by creating a smooth transition. Also ideal for transitions from ceramic tile coverings to finished surfaces. An angle of 90 degrees at the end of the slope will allow the meeting with a thinner floor covering, like a carpet, a wood floor or a vinyl surface.

Diaplas Tile-to-Carpet facilitates the juxtaposition from a ceramic tile surface to a carpeted area. This trim allows insertion of the carpet edge to protect it from fraying over time, increasing the efficiency and durability of your work.

A fine way to join practical and aesthetically-pleasing results.

SHOWN IN BRUSHED SATIN ANODIZED

Diaplas Decorative Listello profiles are designed to enhance the aesthetic appeal of ceramic surfaces, adding a touch of elegance and sophistication to any tile installation. Positioned between two sets of tiles, this listello facilitates a seamless transition while introducing a captivating visual element that breaks the uniformity of the surface. The end result is a more stylish and outstanding appearance that elevates the overall decor. With its high-quality brushed finish, this profile distinguishes itself, ensuring a superior and distinctive look.
