## P profilpas <br> (5) MAP装

Since 1976, Profilpas has been an industry-leading producer of finishing and edge-protection profiles. With two manufacturing plants and eight subsidiaries, Profilpas has become one of the most wellknown and trusted brands among building industry professionals looking for complementary flooring accessories and top-quality solutions. The variety and depth of Profilpas' product catalog range from profiles for wall and floor applications... to transition profiles, baseboards and expansion joints... to profiles for ceramic tiles... to trims for carpets and resilient floors, all designed for both residential and commercial applications. With more than 6,000 SKUs, Profilpas offers one of the most complete and extensive lines in the industry. Thanks to its September 2022 acquisition by MAPEI, one of the world's leading manufacturers of chemical products for the building industry, Profilpas is now part of a global company that has 102 subsidiaries operating in 57 countries and 90 manufacturing plants in 35 nations.

## SUSTAINABILITY isbuilt intr everything we do

MAPEl's processes focus on sustaining the environment for today and tomorrow. We call it "The 3 P's of MAPEI: People, Planet and Products"

PLANET

PRODUCTS

MAPEl's corporate vision, including our Code of Ethics, has always included the philosophy of sustainability.

Our operational processes are designed to reduce our carbon footprint and maximize our environmental "handprint."

With many sustainable attributes and certifications, our products can contribute to a variety of green building standards and certification programs.
(3) MADFI

## A WORLDWIDE LEADER

Originally established in 1937, today MAPEI is a privately owned global corporation headquartered in Milan, Italy, with 102 subsidiaries in 57 countries and 90 plants in 35 nations. The company specializes in manufacturing chemical products for building, including waterproofing products, specialty mortars and admixtures for concrete, products to restore historic buildings, and decorative and protective coatings for concrete surfaces. In addition, MAPEI is the world leader in the manufacturing of mortars, grouts, adhesives and complementary products for installing all types of floor and wall coverings. MAPEI Corporation, the division responsible for supporting the North American markets, is based in Deerfield Beach, Florida, and employs over 1,500 team members - ranging from Manufacturing and R\&D to Technical Services and Sales. MAPEI Caribe, based in Puerto Rico, has more than 65 employees. The Canadian subsidiary MAPEI Inc. supports those efforts with about 360 additional employees.

## HOW TO ORDER

First, choose the product's family and functionality as listed in
the Table of Contents (for example, "Cerfix, Proangle").
Then, determine the following elements:

- The desired shape
- The model
- The material
- The height

Finally, when placing the order, use the letters "PPS" followed by the product's corresponding 5-digit code.
Contact your local MAPEI distributor to place orders and for further information, visit www.mapei.com.

For pricing, shipping terms, and terms and conditions of sale, please refer to our digital catalog/Price list at www.mapei.com.

## SUPERIOR PRODUCTS

A Complete Range of Products
MAPEI produces the most innovative products for the construction market. More than 7,000 products globally (adhesives, sealants, mortars, admixtures, latex, etc.) are manufactured in MAPEl's plants, which produce the world's most complete range of building products. Diversified, high-quality chemical products - from powdered adhesives, to liquid and paste products, to polymers - are created to meet the needs of more than 70,000 customers around the world.

Quality Control
MAPEI is an ISO 9001-2000 certified company. Its products are produced according to exacting standards, strictly adhering to process and procedural guidelines with documented compliance. This rigid production format is vigilantly followed to ensure that every product is produced uniformly from batch to batch.

## PROFESSIONAL SUPPORT NETWORK

Knowledgeable Sales Force
MAPEI offers the largest, most highly trained sales force within the industry to serve your needs for product application/installation recommendations. Its sales representatives are focused on supporting you with product knowledge, product demonstrations, product information, marketing support materials and other relevant tools to help you generate sales.

## Technical Expertise

An in-house Technical Services Call Center responds to customers' telephone inquiries with answers to installation challenges in real time. In addition, MAPEI can offer field support for job startups, product training and on-site problem resolution.

Customer Service Plus
MAPEl's standards for customer service are best-in-class. Our leadership includes such service innovations as:

- Customer-friendly, efficient processes
- One-call resolution
- Employee commitment to effective customer dialog

Innovative Research \& Development
We have always been highly committed to this sector. Our research scientists work within a global network comprising 32 centers, with our Corporate Research Centre in Milan acting as a hub to coordinate the activities of all the other centers and as a central analysis laboratory. The United States has four centers, and Canada has one. All equipped with cutting-edge equipment, the centers collaborate continuously with universities as well as scientific and industrial research institutes.

The research and development laboratories also provide support for our Technical Services Division to help provide solutions for even the most complex requests from our clients. Working alongside these centers are our quality-control laboratories, which are present in all the MAPEI Group's production facilities.

## Best-Backed ${ }^{\text {SM }}$ Warranty Program

To bring it all together, MAPEI complements the industry's best products with simple, easy-tounderstand requirements for a variety of warranty options.

Profilpas
Profiles and Trims (ax) MAPEI

## Profiles for Floors of Equal Height

This line of profiles allows the combination of different materials with elegance and simplicity, extending the boundaries of creativity in design.

## Cerfix ${ }^{\text {m }}$ Proangle ${ }^{m}$

Proangle profiles are for finishing, protecting and decorating floors of same level in ceramic, marble, granite, wood and other materials. These profiles are also ideal as separation and decoration joints between floors made of different materials, as finishing and protection element for the edges of steps, platforms and worktops, and as perimeter profiles for the shaping of doormats. Proangle B in natural aluminum is particularly suitable for materials that require deep polishing, such as marble, resin and wood surfaces.

AIX/

Profiles PROANGLE sandblasted stainless steel finish see page 52.
To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.
Items AIX/ in other heights, on demand for minimun 200 pieces for each height

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Cerfix ${ }^{\text {m }}$ Prodecor ${ }^{\text {m }}$

Prodecor and Prodecor DJ profiles are for finishing and protecting floors of same level in ceramic, marble, granite, wood and other materials. These profiles are also ideal as separation and decoration joints between floors made of different materials, as perimeter profiles for the shaping of doormats or as protection and finishing of platforms and ceramic steps. The visible thickness makes for an elegant separation element perfectly integrated into the floor.

## Proclassic

Proclassic R profiles are specially designed as threshold covers and for hiding junctions and imperfections due to cutting or installing floors made of different materials. The rounded shape covers slight height differences (from 3/32" to $1 / 8$ ", or 2 to 3 mm ) between two different types of flooring. Repairs are particularly easy thanks to the option of using adhesive or screws.

## Proclassic

Proclassic R profiles in stainless steel are particularly suitable for public spaces and for areas subject to frequent and heavy loads. The sparkle of polished stainless steel also matches modern floors and furnishings perfectly. Proclassic R profiles in polished brass are simultaneously classic and modern, and can be easily matched to handles, taps and other furniture accessories of the same material and finish.

## Proclassic

Proclassic F threshold cover profiles have a thickness that allows application under doors. The 19/ and 25/versions include a useful non-slip knurled surface. Installation of the profiles is particularly simple, thanks to the option of using adhesive or screws.

## Cerfix Pronivel

Pronivel NZS/ is a line of ramp profiles composed of an L shape that works as the shoulder and a ramp that is available in 2 widths. Together, these two components eliminate the step between floors of different thickness. The articulated connector enables many combinations as well as the installation of new flooring alongside the connector, even after the application of NZS/.

## Prolevel

Prolevel 67/ is a line of profiles, designed to be applied after the flooring installation, that can compensate for height differences from $1 / 4^{\prime \prime}$ to $1 / 2^{\prime \prime}(6.5$ and 13 mm ).

61/

Prolevel High 55/ and 57/ are two aluminum profiles that eliminate the small step between two floors with a height difference of $5 / 16^{\prime \prime}$ to $31 / 64^{\prime \prime}$ (8 to 12 $\mathrm{mm})$. Available also in blister packs and with adhesive, these profiles can be easily used in DIY installations.

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## External Corner Profiles

Wall profiles are used to protect and decorate. We offer a variety
of finishes and materials to suit
different environments and needs.

## Cerfix ${ }^{m}$ Proangle ${ }^{\text {" }}$ Q

Proangle $Q$ in aluminum is a line of universal square-shaped profiles specially designed to edge and protect the external corners of ceramic coverings. The profiles can be also used for finishing worktops and platforms. ZQVNH/ boasts the certified antibacterial technology (according to the internationally recognized laboratory test JIS Z 2801:2000) that reduces the presence of the most dangerous bacteria up to $99 \%$, thus ensuring the best hygiene over time.

## Cerfix ${ }^{\text {m }}$ Protrim

Protrim in aluminum is a line of profiles with rounded shape, specially designed to edge and protect the external corners of ceramic coverings. Their shape also acts as symmetric finishing and helps to prevent accidents. RVH/ boasts the certified antibacterial technology (according to the internationally recognized laboratory test JIS Z2801:2000) that reduces the presence of the most dangerous bacteria up to 99\%, thus ensuring the best hygiene over time.

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Cerfix ${ }^{\text {m }}$ Protrim

Protrim in stainless steel is a line of rounded-shape profiles specially designed to edge and protect the external corners of ceramic coverings and also recommended for floors, steps and countertops. The AISI 304 versions are recommended for food industries, kitchens, hospitals and outdoor spaces, while the AISI 316 versions are suggested for such difficult applications as swimming pools, spas and sites exposed to salt.

## Cerfix" ${ }^{m}$ Protrim

Protrim in polished brass is both classic and modern at the same time and can be easily combined with handles, taps and other furniture accessories of the same material and finish. The chromium-plated version stands out for its brilliance and is perfect as a decorative element in spaces characterized by elegance and attention to detail.

## Cerfix ${ }^{\text {m }}$ Protrim

Protrim in coextruded PVC is a line of round-shaped profiles specially designed to edge and protect the external corners of ceramic coverings. Their shape also acts as symmetric finishing and helps to prevent accidents. Thanks to the special section with soft PVC inserts, these profiles absorb the micro-movements and tension of the wall coverings. Massdye colored and available in many colors, these profiles can be used in the most varied spaces.

## Cerfix ${ }^{\text {m }}$ Procorner M - Procorner P

Procorner M profiles are designed to protect the external corners of coverings. Recommended for such places as schools, offices, kindergartens and public spaces, they are available in polished brass to highlight the covering corners.

076/SF/
076/A/

Procorner P edge profiles protect in many ways. Recommended for such environments as schools, offices, kindergartens and public spaces, they are made from soft PVC and in bright colors to visually highlight the edges of walls.

IP/40

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.
Item IP/40 in PVC should be stored horizontally.

## Cerfix" Procorner PVC Line

Cerfix Procorner PVC Line 8610 and 8611 are lines of edging profiles in foam PVC that are impact-resistant. Quick and easy to install, they are particularly suitable for DIY installations. Available in vivid colors, they are suitable for sites such as schools, kindergartens and public spaces in general.

## Cerfix" Probord

Stainless-steel Probord ILN are security profiles for the outside corners of wall tiles and can be combined with the Proround $M$ profiles. They are recommended for the prevention of accidents and in environments where high hygienic safety is also required, such as kitchens, the food industry and schools. The version in AISI 316 stainless steel is suitable for swimming pools, spas and environments exposed to salt.

## Glass Proffie

Glass Profile is a line of stainless steel profiles designed to cover the difference in height of the surface with a $2 \%$ slope and create a flat surface with a modern and linear design. Two finishes are offered: Satin stainless steel and matte black colorcoated stainless steel.

## Glass Profile

Glass Profile GPS1/ is a stainless steel profile for the insertion of glass walls of floor-level showers. GPS1/ features a $2 \%$ slope on the shower's inner side, for a perfect aesthetic solution for the sloped surface.

Completing the profile's installation is GPS/6, the end cap for hiding the section of the glass wall.

GPSI/DX/19

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Glass Profile

Glass Profile GPS2/ and GPS14/12 are stainless steel profiles for inserting glass walls on wall coverings. GPS2/ is simple to install, is suitable for tiles of any thickness and does not require drilling. GPS/6 is the end cap to complete the profile, to hide the visible section of the glass wall. GPS14/12 can be affixed directly onto the already installed wall covering.

## Sanibord

Sanibord $\mathrm{BH} / 20$ and $\mathrm{BP} / 20$ are technical profiles made of color-coated aluminum and coextruded PVC and designed to be installed between the wall covering and the bathtub or the shower tray.
These profiles avoid the use of silicone and, besides the aesthetic advantages, guarantee a high hygienic level over time. $\mathrm{BH} / 20$ is manufactured with certified antibacterial technology (according to the internationally recognized laboratory test JIS Z 2801:2000), which allows up to 99\% reduction in the presence of the most harmful bacteria.

## Prostep ${ }^{\text {" }}$

Prostep SGA, SGI, SGN and SGK profiles are designed for the realization and protection of ceramic, marble and stone steps. Thanks to the rounded section, they give elegance to the steps. The versions made of chromium-plated brass and anodized aluminum are not recommended in case of intense foot traffic, whereas those made of stainless steel are particularly suitable for heavy foot traffic.

PPDESIG

Prostep SMA and SM are aluminum and brass profiles for creation and protection of ceramic, marble and stone steps. The grooved top provides a non-slip surface.

PROSTEP

Individually packaged. Items SGK/9 and SGK/11 come in 5-piece packages.

## Safety-Step

Safety-Step slip-resistant adhesive strips consist of abrasive particles aggregated by synthetic resins. They are suitable for all surfaces subjected to heavy traffic, both pedestrian and vehicular, such as stairs, hallways of office and apartment buildings, ramps, walkways, elevators and emergency exits.

Safety-Step slip-resistant adhesive strips consist of abrasive particles aggregated by synthetic resins. They are suitable for all surfaces subjected to heavy traffic, both pedestrian and vehicular, such as stairs, hallways of office and apartment buildings, ramps, walkways, elevators and emergency exits. The gray versions (Resilient Medium / Fine) consist of a rubber surface and are perfect for areas that receive bare foot traffic, such as showers, locker rooms, saunas, boats and sports equipment.

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Cerfix ${ }^{\text {m }}$ Proint

Proint PIA/ and PI/ are two line of profiles in aluminum and PVC, suitable as perimetral connection during the installation of the wall covering and the floor.

The use of Proint PIA/ and PI/ allows to avoid the use of silicone for sealing and, in addition to the aesthetic advantage, it guarantees a high hygiene over time.

The special sections of Proint facilitate the corner connection between the wall covering and the floor.

## Cerfix" Proround ${ }^{\text {" }}$

Proround $B$ in aluminum or $P V C$ is a line of perimeter connection profiles to be used between floors and walls, specially designed for application on already laid surfaces. These profiles are the best solution for renovations and for compliance with hygienic regulations. BLAH/ boasts the certified antibacterial technology (according to the internationally recognized laboratory test JIS Z 2801:2000) that reduces the presence of the most dangerous bacteria up to $99 \%$, thus ensuring the best hygiene over time.

## Movement Joints

The line is designed to allow expansion and contraction. Different finishes are available.

## Cerfix" ${ }^{\text {" }}$ Projoint ${ }^{\text {" }}$

Projoint DIL NE is an expansion joint in co-extruded PVC. Available in three colors and four heights, it is suitable for large areas with pedestrian traffic, allowing the stresses of compression and expansion to be absorbed.

Projoint DIL NJ/ is an expansion joint in co-extruded PVC with perforated side flanges. It can absorb tensile and compression stresses thanks to its central elastic component. Non-toxic, anti-shock and UV-resistant, this joint can be used indoors and outdoors.

NJ/

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

Projoint DIL NL/ is an expansion joint in co-extruded PVC with perforated side flanges. Suitable for floors or marble, it can absorb tensile and compression stresses thanks to its central elastic component. It is suitable for both pedestrian traffic and light driveway traffic (cars and transpallets). Non-toxic, anti-shock and UV-resistant, this joint can be used indoors and outdoors.

Individually packed

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

Projoint NZS is an aluminum expansion joint with high absorption. Thanks to its two interlocking parts, the joint can absorb movements of $+/-3 / 16^{\prime \prime}$ ( 5 mm ) with articulated fins that permit tridimensional movements. This joint protects the edges of tiles and withstands pedestrian and vehicular traffic. NZS is also available as a joint cover when tiles are already installed (NZS/A), or as a side joint for industrial buildings (NZS/L).

NZS/A/40

## Cerfix ${ }^{\text {"' }}$ Procover

Procover Flex is a line of structural aluminum joint covers designed to withstand traction and compression. They withstand both pedestrian and vehicular traffic with rubber wheels (cars). Procover Fix is a line of flat joint cover profiles in aluminum for coplanar floors (GJA/) and perimeter joint cover profiles for the connection of floors and walls (GWA/), suitable to cover structural movements of expansion or compression of two different
 structures.

## Cerfix ${ }^{\text {w" }}$ Procover

Procover G joint-covering profile made of anodized aluminum is suitable for creating continuity on structures with continuous bays. This joint covering is supplied with adhesive or can be secured with screws and dowels. In the illustration it is perforated laterally and adfixed only to one structure, allowing free sliding over the other.

G/60/

G/80/

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

Procover G joint-covering profiles in stainless steel and polished brass are suitable for creating continuity on structures with continuous bays. These joint coverings are supplied with adhesive or can be secured with screws and dowels. In these illustrations they are perforated laterally and adfixed only to one structure, allowing free sliding over the other. In these versions, they are suitable even to vehicular traffic.

## Profiles for Resilient Floors, Wood, Engineered Wood, Carpet and Carpet Tiles

Enjoy a full range of profile options for wood, laminate and LVT flooring. Several systems and professional solutions are available in various colors of anodized aluminum and in the exclusive durable film finishes, with the possibility of further customization thanks to Profilpas Digital System (PDS) technology

## Unisystem"' Plus

Unisystem Plus is a system for the installation of resilient flooring and carpet tiles from $7 / 4^{\prime \prime}$ to $7 / 8^{\prime \prime}(6.5$ to 22.6 mm ) in thickness. Composed of transition profiles for floors with the same or different heights, perimeter profiles and stairnosing profiles, Unisystem Plus is easy to install and simple to remove. The system is composed of a top profile, an aluminum base and a fixing clip. After inserting the fixing clip in the top profile, just push the top profile to clip it to the aluminum base.

Adfix the aluminum base to the subfloor with screws or glue

Insert the top profile into the base

Adjust the flooring to fit

Adjust and level the cover by pushing it down

Customized PDS decors on request, see page 166-167
Profiles of 8' 10 " ( 270 cm ) length: please order the base separately.
To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Unisystem" ${ }^{\text {" }}$ Plus

G/4/SF is a stair-nosing profile of the Unisystem Plus line. Composed of a base and a top profile, it is suitable for the installation of resilient flooring with thicknesses ranging from $1 / 4^{\prime \prime}$ to $9 / 16$ " ( 6.5 to 15.5 mm ).

Customized PDS decors on request,
see page 166-167
Profiles of 8' 10" ( 270 cm ) length: please order the base separately.

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Profix Thin

Profix Thin is a system for the installation of thin resilient flooring 5/32" to 5/16" ( 4 to 8 mm ) in thickness, made up of junction profiles for same-level floors (Z/4), connection profiles for different-level floors (C/4) and perimeter profiles (S/4). The system is composed of a PVC base and a top profile available in different finishes of anodized aluminum or covered with a durable wood-, stone- or concrete-effect film for matching floors perfectly.

## Alfix 616

Alfix 616 is a professional system for the installation of wood and resilent floors $1 / 4^{\prime \prime}$ to $5 / 8^{\prime \prime}(6$ to 16 mm ) in thickness. The system is composed of a top profile in anodized aluminum adfixed with screws on a natural aluminum base. The screws, included in the packaging, perfectly match the color of the top profile.

FIX/J/44

FIX/T/33

[^16]
## Alfix 46

Alfix 46 is a professional system for the installation of LVT floors 5/32" to 1/4" (4 to 6 mm ) in thickness. This system is characterized by top profiles in anodized aluminum, adfixed with a screw system on a natural aluminum base. Screws, included in the package, match the anodization in color and, once adfixed, integrate with the top profile.

Profilpas Digital System no limits to imagination

You can choose from more than 400 standard durable decors to perfectly combine a profile or baseboard with the floor. We offer a wide selection for wood, stone and concrete decors, to meet every need. Just consult our PDS chain set to choose the best color that matches your needs.

But that's not all. Customization is literally limitless with Profilpas. Just provide us with a sample for creating any further decor, even a fantasy one!

This is possible thanks to Profilpas Digital System (PDS), the innovative digital printing technology of Profilpas to reproduce any decor on durable film, eliminating any limits on your imagination. The whole production process takes place in our factory, from the scanning to the printing to the applying of the film. Contact our customer service to learn more.

## LED (white light)

Measure how many feet/meters of LED strip must be installed on our profiles. A spool is 16.4 ' or 5 m long. Spools have 120 LED every 3.28 or 1 m . The voltage is 24 volts. The energy usage is 2.92 watts every foot, or 9.6 watts every 1 m . To determine the energy usage, multiply the length in feet by 2.92, or in meters by 9.6.

Examples: $10^{\prime} \times 2.92$ watts $=29.2$ total watts, $7.4 \mathrm{~m} \times 9.6$ watts $=71$ total watts
Choose the color of the light. LED strips are available in neutral white light $\left(4000^{\circ} \mathrm{K}\right)$ or warm white light ( $3000^{\circ} \mathrm{K}$ ).
Choose the degree of protection: IP33 for inside and dry spaces, IP67 for outside or moist spaces.

## POWER SUPPLIES

Choose the suitable power supply on the basis of the total watts, being careful not to exceed 90\% of the maximum power.

Example: For 71W, a power supply of 79W capacity is required (71 = 90\% of 79), so use the 90W power supply.

|  | Item |  |  |
| :--- | :--- | :--- | :--- |
| $1-15 / 16^{\prime \prime}$ to $18.04^{\prime}(5 \mathrm{~cm}$ to 5.5 m$)$ | 60 W | $\mathrm{AL} / 60 / 24$ | 84150 |
| $18{ }^{\prime}$ to $27.5^{\prime}(5.6 \mathrm{~m}$ to 8.4 m$)$ | 90 W | $\mathrm{AL} / 90 / 24$ | 84152 |
| $27.5^{\prime}$ to $36.5^{\prime}(8.5 \mathrm{~m}$ to 11.2 m$)$ | 120 W | $\mathrm{AL} / 120 / 24$ | 84154 |
| $36.5^{\prime}$ to $46^{\prime}(17.3 \mathrm{~m}$ to 14 m$)$ | 150 W | $\mathrm{AL} / 150 / 24$ | 84156 |

We recommend powering the LED strips every 10' or 3 m in order to avoid differences in brightness and the overheating of the LED in the initial part of them. A cable with $3 / 64^{12}$ or $1 \mathrm{~mm}^{2}$ section has a maximum range of about 4 amps and a voltage drop of 1 volt every 32 or 10 m . For specialized installations, contact our Technical Services Department.

## DIMMER (optional)

The dimmer/fader/driver adjusts the intensity of LED light. It supports a maximum of 10 amps to a maximum length of 82 or 25 m of our LED strip. It must be placed between the power supply and the LED strip, and must be connected to a switch (not supplied) and/or to the receiver of the remote control (optional).

In the case of more lines being turned on simultaneously, the first dimmer is connected in sync mode and it will switch on the consecutive dimmers.

Example: To connect 3 lines that will be turned on simultaneously, use 3 dimmers.

## REMOTE CONTROL + RECEIVER (optional)

The remote control emits a radio frequency and can control up to 4 channels. Used with the master control unit, it is used to turn on/off the LEDs.

The receiver must be installed between the power supply and the LED strip, or connected to the dimmer if present.

If there is a dimmer, the remote control can adjust the LED light intensity.

## ELECTRICAL CABLES

The cables are necessary to connect the power supply to the LED strips where needed

A cable with $3 / 64^{12}$ or $1 \mathrm{~mm}^{2}$ section has a maximum range of about 4 amps and a voltage drop of 1 volt every 32 or 10 m .

## CONNECTORS

Item IR/CO1 connects the LED strips to the line of the power supply. Item IR/W3 connects a maximum of 3 cables.

## LED RGB (colored light) $\square \square$

Measure how many feet/meters of LED strip must be installed on our profiles. A spool is 16.4 or 5 m long. Spools can be cut every $3-15 / 16$ " or 10 cm . The voltage is 24 volts. The energy usage is 4.39 watts every foot, or 14.4 watts every meter. To determine the energy usage, multiply the length in feet by 4.39, or in meters by 14.4.

Examples: 10' $\times 4.39$ watts $=43.9$ total watts, 7.4 m x 14.4 watts $=106.6$ total watts

RGB LED strips are available in degree of protection IP67, are covered with silicone sheath and are provided with adhesive for the fastening in inside or outside spaces.

## POWER SUPPLIES

Choose the suitable power supply on the basis of the total watts, being careful not to exceed 90\% of the maximum power

For 106.6 W , a power supply of 118 W capacity is required (106.6 = 90\% of 118), so use the 120W power supply.

|  |  |  |  |
| :--- | :--- | :--- | :--- |
| 3-15/16" to $122^{\prime}(10 \mathrm{~cm}$ to 3.7 m$)$ | 60 W | $\mathrm{AL} / 60 / 24$ | 84150 |
| $12^{\prime}$ to $18^{\prime}(3.8 \mathrm{~m}$ to 5.5 m$)$ | 90 W | $\mathrm{AL} / 90 / 24$ | 84152 |
| $18^{\prime}$ to $24.5(5.6 \mathrm{~m}$ to 7.5 m$)$ | 120 W | $\mathrm{AL} / 120 / 24$ | 84154 |
| $24.5^{\prime}$ to $30.5^{\prime}(7.6 \mathrm{~m}$ to 9.3 m$)$ | 150 W | $\mathrm{AL} / 150 / 24$ | 84156 |

We recommend powering the LED strips every ${ }^{10}$ or 3 m in order to avoid differences in brightness and the overheating of the LED in the initial part of them. A cable with $3 / 64^{\prime \prime}$ or $1 \mathrm{~mm}^{2}$ section has a maximum range of about 4 amps and a voltage drop of 1 volt every 32 or 10 m . For lengths over 30.5 ' or 9.3 m , see the "Slave Control Unit" section below. For specialized installations, contact our Technical Services Department

## REMOTE CONTROL

The remote control emits a radio frequency and can control up to 4 channels. Used with the master control unit, it is used to turn on/off the LEDs, adjust light intensity and choose the color/sequence of the LEDs.

## MASTER CONTROL UNIT

Connected with the remote control, the master control unit is used to turn on/off the LEDs, adjust light intensity and choose the color/ sequence of the LEDs.
It must be connected between the power supply and the LED strip.

## SLAVE CONTROL UNIT

Every time that the system needs more lines controlled by just one unit, 1 slave switch must be added for every additional line.

Example: To connect 3 lines with simultaneous lighting, use 1 master control unit and 2 slave switch control units.

The slave control unit must be connected to the master control unit with RJII 6-poles cable (not supplied).

## ELECTRICAL CABLES

The cable has 4 poles, 3 of them have a $1 / 64^{\prime \prime 2}$ or $0.5 \mathrm{~mm}^{2}$ section (for the three colors), one of them has a $3 / 64^{122}$ or $1 \mathrm{~mm}^{2}$ section (for the negative pole).

## CONNECTORS

Item IR/C02 connects the LED strips with coloured light to the line of power supply, with a length of $5-7 / 8$ " or 15 cm .
Item IR/CO3 connects LED strips to LED strips with colored light, with a length of $5-7 / 8$ " or 15 cm .

We recommend assigning the assembly of the electrical components to qualified staff.

## Prolight

When selecting electrical components and accessories for Prolight profiles, each element must be chosen based on the established length of the light profiles. The energy usage in watts per feet/meter must be calculated in order to choose one or more power supplies to be combined with the dimmer and the controller.

## Metal Skirting Boards

Metal Line profiles, made of stainless steel and aluminum, come in wide variety of trendy styles and colors for residential and commercial environments.

## Metal Line

Metal Line 90 is an aluminum baseboard, available in different finishes, that creates an elegant junction between the wall and the floor. The terminal is curved to adapt perfectly to the floor. Metal Line 90 is also available in white and black Trend Color Stone, two matte colors that perfectly match the most modern tile floorings. The baseboards can be curved using a standard bending machine.

Metal Line 90 can be curved by using a standard bending machine.
The self-adhesive version in height 4, 5, 7, and 10 is available on request, with a minimum order of 100 pcs.
RAL 9003, RAL 7038, RAL 8019, RAL 9006, RAL 9007 color-coated aluminum skirting boards are available on request, with a minimum order of 150 pcs. For other colors, please contact our sales department.
To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Metal Line

Metal Line 790 is a baseboard in polished or satin stainless steel, available in different heights, that follows the minimalist trends of modern design. Thanks to the curved section, this baseboard perfectly hides the perimeter expansion gap of a floating floor.

790/ME
790/MES

790/MP
790/MPS

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

## Metal Line

Metal Line 89 is an aluminum baseboard characterized by minimalist lines. Available in different finishes and heights, it outlines the space with simplicity and elegance. Affixed on the wall with a specialized adhesive, it perfectly hides the perimeter expansion gap of a floating floor, as well as having a decorative role.
Metal Line 89 is also available in white and black Trend Color Stone, two matte colors that perfectly combine with the most modern flooring.

## Metal Line

Metal Line 87/6 and 88/6 are two flush, recessed baseboards for plaster, plasterboards and other types of wallboards. Both are composed of two separate elements: A base in natural aluminum and an insert in silver anodized or matte white color-coated aluminum. Once installed, the baseboard integrates perfectly into the wall surface, outlining the perimeter of the space without limiting it. There are two phases of installation: The base element must be installed before finishing the walls, while the chosen insert must be placed after the flooring installation.

## Metal Line

Metal Line 98 is an aluminum baseboard featuring a rounded design and a thickness that allows the housing of service cables (for phones, computers, TVs, etc.). A simple and functional interlocking installation system with natural aluminum supports, once affixed to walls, allows easy access to the cables for their maintenance.

98/7SF silver anodized aluminum $+\mathrm{S} / 95$ aluminum support

Metal Line 97/4 is an aluminum baseboard that measures 1-9/16" ( 4 cm ) high and can house service cables (for phones, computers, TVs, etc.). Thanks to its simple interlocking installation system with stainless-steel clips to be affixed to walls with screws and dowels, it combines ease and speed of installation with easy access to the cables for their maintenance.

97/4SF silver anodized aluminum $+8602 / C$ fixing clip

Ancient gray, RAL 9003, RAL 7038, RAL 8019, RAL 9006, RAL 9007 color-coated aluminum skirting boards are available on request, with a minimum order of 150 pieces.
For other colors, please contact our sales department.

Metal Line 97/8 is an aluminum baseboard that measures $3-1 / 8$ " ( 8 cm ) high and is specially designed for housing service cables. Its specific PVC-cable trunking, once affixed to walls with screws and dowels, also acts as a support for the baseboard. It is particularly suitable for renovations, as it avoids making new tracks for the running of cables. It is also simple and quick to install, using natura aluminum supports that allow easy access to the cables for maintenance.

## PVC Line

PVC Line 8605 and 8606 are two skirting boards in co-extruded PVC, characterized by a rounded shape and a height of 2-3/4" or 70 mm . Both are composed of a core in foam PVC and a visible surface in colored rigid PVC to guarantee the best aesthetic result and color uniformity. 8605 can also be covered with durable film and can be further customized thanks to the digital printing technology Profilpas Digital System. 8505 and 8606 can be fixed to the wall with adhesive (PP/96) or nails. Moreover, they do not absorb water and are resistant to impact, wear and tear, UV rays and the products normally used for cleaning floors and wall coverings.

## PVC Line

PVC Line 8608 is a baseboard in PVC foam, characterized by a round shape and covered with durable film. Available in several finishes, it can be further customized thanks to the digital printing technology Profilpas Digital System. 8608 can be affixed to the wall with adhesive (PP/96 or similar), nails or special fixing clips. PVC does not absorb water; does not contain formaldehyde; and is resistant to shocks, wear, UV rays and the most common cleaning products for floors and wall coverings.

8608/C

Use MAPEI polymer-based adhesive for baseboards.

Customized PDS decors on request for 8608 with a minimum order of 200 pieces.

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

PLASTIC-COATED PVC

[^21]PVC Line 8181 is a baseboard in plasticcoated PVC that measures $2-3 / 4$ " or 70 mm in height, characterized by a special shape that makes it suitable for installation on curved walls. 8181 is particularly suitable for DIY installation, thanks to its quick and easy application. Available in different colors, it must be affixed to the wall with adhesive.

8181

[^22]
## PVC Line

PVC Line 8596 and 8598 are two varieties of impact-resistant baseboards in foam PVC. The upper part that rests on the wall and the lower part that rests on the floor are composed of soft material. These baseboards allow for perfect adhesion even to surfaces that are not perfectly flat, for speed and simplicity of application. They are available in different colors and can be affixed with adhesive (PP/96).

## PVC Line

PVC Line 148 is a baseboard for carpet and PVC flooring that is composed of a base in rigid PVC and a clip in soft PVC. Used as internal corner connection profile, it creates a curvature on the corner once the flooring has been installed. It also allows finishing and covering the extremities of the carpet or the PVC flooring, thus hiding any cutting inaccuracies. This profile is recommended for public spaces such as hospitals and schools.

## Cerfix ${ }^{m}$ Protec

Protec CPCV and CPCl are a series of edge profiles for protecting and finishing the outside edges of terraces and balconies. Available in color-coated aluminum and stainless steel, they have been designed with a protruding section and can be used with tile thicknesses up to $3 / 4^{\prime \prime}$ or 21 mm . They also guarantee the outflow of water from the floor, avoiding contact with the wall. In addition, Protec CPCV is available in the bendable version CPCVF, provided with a special cutout that allows the profile to be bent with a radius up to 3.28 or 1 m .

CPCV/30//E ancient gray color-coated aluminum

Protec CPNV is a series of edge profiles for protecting and finishing the outside edges of terraces and balconies. Available in color-coated aluminum, these profiles are well suited for protecting the borders of steps or sidewalks, because they hide the junctions between treads and risers. In addition, Protec CPNV is available in the bendable version CPNVF, provided with a special cutout that allows the profile to be bent with a radius up to 15$3 / 4^{\prime \prime}$ or 40 cm .

## Cerfix ${ }^{m}$ Protec

Protec CPGV is a perimeter profile for protecting and finishing the outside edges of terraces and balconies. This profile is composed of a vertical part that facilitates the outflow of rainwater from the tiled surface and protects the border of the floor, and a sloping part equipped with holes for a further discharge of the water. This technical solution and the consequent drainage reduce the problems of freezing and thawing as well as unsightly efflorescence on tile grout. The profile can be used with tile thicknesses up to $1 / 2$ " or 12.5 mm .

## Cerfix ${ }^{m}$ Protec

Protec CPEV and CPEI edge-reversible profiles are designed for protecting and finishing the outside edges of terraces and balconies. Available in stainless steel and color-coated aluminum, these profiles can be installed flush with the border or detached from it. They can be used with tile or marble at thicknesses of $3 / 8^{\prime \prime}$ to $1-1 / 4^{\prime \prime}(11$ to 32 mm ). The particular design is recommended to protect the stair nosing and sidewalk edge, hiding the connection between treads and risers.

## Cerfix ${ }^{\text {m" }}$ Protec

Protec CPHA and CPHV are edge profiles in anodized and color-coated aluminum for terraces, balconies and sidewalks. The shape allows the outflow of water, avoiding direct contact with the screed. Installed along the perimeter, these profiles can outline ceramic tiles and protect the border in many fields of use. They can be used with tile thicknesses up to $3 / 4^{\prime \prime}$ or 21 mm .

CPHA//E silver anodized aluminum

To place orders correctly, find the desired model, size and finish. Then place your order by using the letters "PPS" followed by the corresponding 5-digit code.

CPHA//E
CPHV//E

Protec CPLV is a line of perimeter profiles in color-coated aluminum for protecting and finishing the borders of outdoor raised floors, terraces and balconies. These profiles are composed of a drilled base CPLB to be screwed to the supports, or, as an alternative, a cut base CPLB/2 for installed tiles, and a visible profile to be fixed with adhesive, available in 3 different heights according to the floor thickness. There are also special accessories for the creation of external corners and junctions.

Materials and Characteristics

## MATERIALS AND CHARACTERISTICS

The following information summarizes the main characteristics of the materials. Further information is available upon request of the product specifications.

## NATURAL BRASS

Alloy CW624N UNI EN 12167: The profiles are produced by extrusion. They have a good resistance to chemical agents and mechanical stresses. On the visible parts the brass naturally oxidizes to create a superficial glaze. The brass, when exposed to corrosive agents or high humidity, is subject to phenomena of high oxidation and can present superficial spots. Where necessary, it can be restored to its original state by using abrasives or specific polishing products.

## POLISHED BRASS

Alloy CW624N UNI EN 12167: The profiles are produced by extrusion and then mechanically polished. The visible surface must be protected from scratches and frictions. The resistance to chemical agents and mechanical stresses is good. On the visible parts the brass naturally oxidizes to create a superficial glaze. The brass, when exposed to corrosive agents or high humidity, is subject to phenomena of high oxidation and can present superficial spots. Where necessary, it can be restored to its original state by using abrasives or specific polishing products.

## CHROMIUM-PLATED BRASS

Alloy CW624N UNI EN 12167: The profiles are produced by extrusion and then chromed. They are resistant to ultraviolet rays, weathering and chemical agents. They are not suitable for applications in floors with intense mechanical stresses.

## NATURAL ALUMINUM

Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6): The profiles are produced by extrusion and guarantee a fair resistance to atmospheric and chemical agents. The cement and its derivatives produce, if wet, alkaline substances that, acting on the surface, can corrode the metal (formation of hydroxide of aluminum). For that reason, the visible surface of the profile must be immediately cleaned from cement, glue and other materials used for joints.

## ANODIZED ALUMINUM

Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6): The profiles are produced by extrusion and then anodized. They have a good resistance to atmospheric and chemical agents. The cement and its derivates produce, if wet, alkaline substances that, acting on the surface, can corrode the metal (formation of hydroxide of aluminum). For that reason, the visible surface of the profile must be immediately and gently cleaned from cement, glue and other materials used for joints. Wear and pedestrian traffic could damage the surface (in cases of profiles laid on the floor) and remove the original anodized finish.

## POLISHED ALUMINUM

Alloy of Al-Mg-Si thermically treated in conditions 76 (6463 T6): The profiles are produced by extrusion and then mechanically treated and processed. They guarantee a fair resistance to atmospheric and chemical agents. The cement and its derivates produce, if wet, alkaline substances that, acting on the surface, can corrode the metal (formation of hydroxide of aluminum). For that reason, the visible surface of the profile must be immediately and gently cleaned from cement, glue and other materials used for joints. Polished aluminum profiles are not suitable for floor applications.

## COLOR-COATED ALUMINUM

Alloy of Al-Mg-Si thermically treated in conditions 76 (6060 T6): The profiles are made by extrusion and then coated with a thickness of $\geq 80 \mu \mathrm{~m}$. They have a fair resistance to atmospheric and chemical agents while they do not have a good resistance to mechanical
stresses that would damage the surface enamel; therefore they are not recommended for floor applications. For that reason, the visible surface of the profile must be immediately and gently cleaned from cement, glue and other materials used for joints.

## FOILED ALUMINUM

Alloy of Al-Mg-Si thermically treated in conditions T6 (6060 T6): The profiles are produced by extrusion in natural alloy. The wood decoration is obtained by foiling the aluminum profiles with a special film, resistant to wear, perfectly reproducing grains and colors of wood.

## STAINLESS STEEL - AISI 430

This kind of stainless steel has a moderate resistance to corrosive agents. It is recommended exclusively for indoor use.

## STAINLESS STEEL - AISI 304

This is extremely resistant to most chemical and atmospheric agents, lime, mortar, tile glue and common cleaning products. It is recommended for outdoor use, food processing plants, hospitals, etc.

## STAINLESS STEEL - AISI 316

This is extremely resistant to most chemical and atmospheric agents, lime, mortar, tile glue and common cleaning products. Moreover it has a good resistance to chlorine and salt, and is particularly recommended for extreme conditions of use.

## INSTALLATION WARNING

Even stainless steel can be damaged if not treated with proper precautions during the installation. In particular, pay attention to: keeping the profiles protected inside their individual packaging up until the installation. (This precaution allows to avoid the contamination with other ferrous materials during the transport.) Avoiding the direct contact with cleaning products for cotto tiles and marble, decalcifying agents and cleaners containing chlorine and its compounds. Be cautious about the gases of hydrochloric acid during the cleaning of special floors. After installation, proceed immediately with an accurate cleaning of the surface with plenty of water and the consequent drying.

## MAINTENANCE WARNING

Frequent cleaning is essential to preserve the beauty of stainless-steel profile surfaces. Pay close attention to the treatment of the profiles' surface during the installation. Immediately after installation, clean by rinsing the surfaces accurately. Avoid the use of abrasive products that may scratch the profiles. Do not use cleaners containing chlorine or its compounds, such as bleach, muriatic acid and decalcifying agents. Do not use abrasive sponges or wire wools that may scratch the surface or leave rust stains.

## CHROMIUM-PLATED STAINLESS STEEL - AISI 304 (Profilpas design)

Offering a refined aesthetic value, this is suitable for wall coverings but not for floors: Cleaning maintenance should be done with sponges or soft and non-abrasive cloths as well as neutral detergents.

## Rigid PVC

Vinyl compound of rigid PVC. Unleaded, anti-shock and nonflammable. Eco-friendly mixture with Ca-Zn salts.

## Plasticized PVC

Vinyl compound of plasticized PVC. Unleaded and nonflammable. Ecofriendly mixture with Ca-Zn salts.

## Foam PVC

Vinyl compound of foam PVC. Unleaded and nonflammable. Ecofriendly mixture with Ca-Zn salts

## Co-Extruded PVC - Rigid/Rigid

Vinyl compound of rigid PVC. Unleaded, anti-shock and nonflammable. Eco-friendly mixture with $\mathrm{Ca}-\mathrm{Zn}$ salts.

## Co-Extruded PVC - Plasticized/Plasticized

Vinyl compound of plasticized PVC. Unleaded and nonflammable. Ecofriendly mixture with $\mathrm{Ca}-\mathrm{Zn}$ salts.

## Co-Extruded PVC - Rigid/Plasticized

Vinyl compound of rigid PVC: Unleaded, anti-shock and nonflammable. Eco-friendly mixture with Ca-Zn salts. Vinyl compound of plasticized PVC: Unleaded and nonflammable. Eco-friendly mixture with Ca-Zn salts.

## Co-Extruded PVC - Rigid/Plasticized Anti-Mold

Vinyl compound of rigid PVC: Unleaded, anti-shock and nonflammable. Eco-friendly mixture with Ca-Zn salts. Vinyl compound of plasticized PVC: Unleaded, nonflammable and injected with biocide. Eco-friendly mixture with $\mathrm{Ca}-\mathrm{Zn}$ salts.

## Co-Extruded PVC - Foam/Plasticized

Vinyl compound of foam PVC: Unleaded and nonflammable. Ecofriendly mixture with Ca-Zn salts. Vinyl compound of plasticized PVC: Unleaded and nonflammable. Eco-friendly mixture with Ca-Zn salts.

CLEANING AND MAINTENANCE TIPS

| MATERIAL | FINISHING | CLEANING AFTER INSTALLATION | MAINTENANCE |
| :---: | :---: | :---: | :---: |
| Aluminum | Anodized | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |
| Aluminum | Bril. polished | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |
| Aluminum | Bright polished copper | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |
| Aluminum | Bright polished titanium | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |
| Aluminum | Bright polished gold | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |
| Aluminum | Color-coated | Use of acid-based cleaners | Use neutral or alkaline detergents |
| Aluminum | Bright satin | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |
| Stainless steel | Polished | Use of acid-based cleaners without chlorine | Use neutral or alkaline detergents |
| Stainless steel | Inox AISI 316 | Use of acid-based cleaners | Exclusive use of neutral cleaning products |
| Stainless steel | Sandblast | Use of acid-based cleaners only neutral | Use neutral or alkaline detergents |
| Stainless steel | Satin | Use of acid-based cleaners without chlorine | Use neutral or alkaline detergents |
| Brass | Natural | Use of acid-based cleaners only neutral | Exclusive use of neutral cleaning products |
| Brass | Polished | Use of acid-based cleaners only neutral | Exclusive use of neutral cleaning products |
| Brass | Chromiumplated | Use of acid-based cleaners | Use neutral or alkaline detergents |
| PVC |  | Use of acid-based cleaners and not alkaline | Exclusive use of neutral cleaning products |

## PROFILES' CHARACTERISTICS AND PACKAGING SELF-ADHESIVE PROFILES

Self-adhesive profiles are made of nontoxic, nonflammable and solvent-free hot-melt glues. Although these products are nonflammable, they should not be exposed to open flames. Product preservation is guaranteed when storage takes place in "normal" climatic conditions.

Glue deteriorates at temperatures over $194^{\circ} \mathrm{F}\left(90^{\circ} \mathrm{C}\right)$ and crystallizes at temperatures below $5^{\circ} \mathrm{F}\left(-15^{\circ} \mathrm{C}\right)$. During the application, the temperature of self-adhesive profiles and the ambient temperature where profiles have to be installed should not be below $50^{\circ} \mathrm{F}\left(10^{\circ} \mathrm{C}\right)$.

Important: Self-adhesive profiles cannot be installed on friable supports, as a junction between two carpeted floors, or between PVC floors and wall coverings.

## DRILLED PROFILES

Some of the profiles can be fastened using flat-head or round-head screws. Acceptable screw sizes are 1/8" and 9/64" (3 and 3.5 mm ).

## PACKAGING

The means blister packaging.
"Individually packaged" means that the packaging is made for the single profile with a protective shrink-wrap film.

## DIRECTIONS

Do not use aggressive chemicals, as they could stain the metals. In particular lime, mortar or tile glue cause scratches on the visible surface of profiles. Therefore it is necessary to clean these parts immediately after installing of the profiles. Please note that in the current catalog, due to printing limitations, the color shades can be slightly different from the actual colors.

## TERMS AND CONDITIONS OF SALE

1. Legal Effect: "Seller" herein means and refers to MAPEI Corporation, whose mailing address is 1144 East Newport Center Drive, Deerfield Beach, Florida 33442 and "Buyer" herein means and refers to a purchaser of Seller's goods who is subject to the terms and conditions contained herein. Seller's sale to Buyer is limited to and expressly made conditional on Buyer's assent to these terms and conditions of sale and any other provisions set forth on Seller's sales invoice and in the Bill of Lading. This agreement is effective as of February 1, 2024.
2. Pricing: Unless otherwise expressly set forth on Seller's sales invoice or in the Bill of Lading, all prices are net F.O.B. Seller's nearest plant location and are exclusive of any sales, use or property taxes; freight and fuel charges; and other Seller expenses associated with this sales transaction. Prices are effective February 1, 2024. This agreement supersedes all previously published price lists. Prices are subject to change without notice. Any clerical errors by Seller are subject to correction. Seller's goods may be withdrawn or modified without notice.
3. Purchase Orders: All purchase orders are subject to Seller's approval. Purchase orders may be placed via fax or e-mail. Purchases of products in our Complementary Profiles and Trims line are subject to freight and shipping charges. Please refer to the "Freight and Shipping Charges" table on the next page or contact customer service for additional information. For all other products, purchases under $\$ 500.00$ will be subject to a $\$ 75.00$ handling fee, plus actual shipping charges. Goods sold by Seller under this agreement must be purchased in full case quantity only. Not withstanding any contrary provision herein, all custom orders require a minimum purchase of one ( 7 ) full batch and may take up to twenty-one (21) business days to manufacture after the date of Seller's acceptance of that order; and are not cancelable or returnable. For customized grout color orders, there are additional purchasing requirements which can be obtained from Seller's customer service department and those additional requirements are incorporated by reference.
4. Shipping: Unless Buyer specifies otherwise in writing, (a) goods will be shipped as Seller may deem proper, and (b) routing and manner of shipment will be at Seller's sole discretion. If special routing instructions are given by Buyer or Seller has incurred any additional freight cost that may arise while in transit or during delivery beyond Seller's responsibility, then Buyer agrees to pay any and all additional handling and transportation charges. Any discrepancy or damage with respect to Seller's prepaid freight must be reported on the Bill of Lading at the time of delivery and Seller must be notified at that time in writing, failing which will result in a claim being denied by Seller. Any damage or loss in transit on a Buyer arranged carrier is beyond Seller's control and Seller is not responsible or liable for that damage or loss, and those claims must be made directly to the carrier by Buyer, including cargo insufficiently secured or improperly protected from inclement weather that may occur. Due to Federal Department of Transportation regulations, certain goods may not be shipped via air freight.
5. Delivery: Delivery and shipment dates are estimated dates only and are not guaranteed. In estimating such dates, no allowance has been made nor shall Seller be liable for any damages, losses, penalties, whether direct, indirect, special, incidental or consequential, resulting from Seller's failure, inability, or delay in its performance herein by reason of a force majeure event (hereinafter defined).
6. Credit and Payments: Unless otherwise noted on Seller's sales invoice or on the Bill of Lading, payment shall be made net thirty (30) calendar days from the purchase order invoice date. A finance charge of $1.5 \%$ per month ( $18 \%$ per annum) will be charged on all past due invoices. Seller reserves the right at any time to alter or suspend credit, or to change payment or credit terms when, in its sole discretion, Buyer's financial condition so warrants. Buyer's failure to pay an invoice, when due, shall entitle the Seller to the following options, at Seller's sole election: (a) make all subsequent invoices immediately due and payable, irrespective of terms, and Seller may withhold all subsequent deliveries under all outstanding orders until full payment is received; (b) require payment in advance; (c) require cash on delivery; or (d) require satisfactory security for future orders. In the event Buyer becomes insolvent or files for bankruptcy, or upon a breach of the terms herein or of any provision contained on Seller's sales invoice, or an anticipatory repudiation by Buyer, Seller shall have the right to stop delivery of the goods and Buyer shall be liable to Seller for any and all expenses incurred by Seller as a result of that action including, but not limited to, liabilities to third parties, collection costs, attorneys' fees, and any associated costs incurred by Seller.
7. Returns: A written "Return Goods Authorization Form" must be completed by Buyer. Seller will only accept returns if the goods are resalable and returned within sixty (60) calendar days after the date of the purchase order. All returns are subject to a minimum twenty-five percent (25\%) restocking charge and Buyer must prepay freight.
8. Claims; Limitation of Liability: It shall be the duty of Buyer to thoroughly inspect the goods purchased from Seller. All product claims relating to the goods purchased from Seller including, but not limited to, claims of defect in goods or a non-conforming discrepancy in quantity, and which are unrelated to transit, shall be made in writing to Seller's Customer Service Department within seven (7) calendar days of receipt of the goods by Buyer. If goods sold herein contain defects in material or workmanship demonstrated to Seller's satisfaction to have existed at the time of departure from Seller's plant, Seller reserves the right to inspect those goods in Buyer's possession or request their return, and Seller, at its sole election, shall either: (a) replace the defective goods at Seller's expense F.O.B. Seller's nearest plant location, or (b) give Buyer proper credit in the amount of the purchase price of those defective goods. The foregoing shall \not apply to goods that have been subjected to alteration, contamination, improper maintenance or storage, misapplication, misuse, negligence, or accident after shipment from Seller's plant by anyone except Seller's authorized agents. THE REMEDY SET FORTH IN THIS PARAGRAPH 8 SHALL BE THE SOLE AND EXCLUSIVE REMEDY AVAILABLE TO BUYER, AND IS IN LIEU OF ANY AND ALL OTHER REMEDIES FOR DAMAGES INCLUDING, BUT NOT LIMITED TO, DIRECT, INDIRECT, CONSEQUENTIAL, SPECIAL OR INCIDENTAL DAMAGE, OR FOR LOST PROFITS, OR BUSINESS INTERRUPTION. IN NO EVENT WILL SELLER'S TOTAL LIABILITY EXCEED THE PURCHASE PRICE FOR THE SPECIFIC GOODS FOR WHICH LIABILITY IS CLAIMED. BUYER IS SOLELY RESPONSIBLE FOR DETERMINING SUITABILITY FOR USE AND SELLER SHALL IN NO EVENT BE LIABLE IN THIS RESPECT. Failure to make any such written claim within the above-prescribed time period shall constitute waiver of any such claim and shall be deemed acceptance of such goods.
9. Warranty: Unless otherwise provided herein, Seller warrants title and that all goods sold hereunder shall conform to Seller's standard product specifications in effect on the date of shipment. ALL OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED. No employee, representative, or agent of Seller is authorized to make any other warranty, statement, promise, representation, or guarantee with respect to the goods covered herein.
10. Termination: Seller may, by written notice to Buyer, terminate this agreement under any of the following circumstances: (a) Buyer fails to remit payment within the time specified herein; (b) Buyer fails to comply with any of the other provisions herein; (c) Buyer becomes insolvent or files for bankruptcy, or engages in any act which reasonably concerns Seller regarding Buyer's ability to complete its obligations under this agreement; or (d) upon thirty (30) calendar days prior written notice. Upon such termination, Buyer shall be responsible for the payment of all delivered goods, which obligation shall remain in effect until fully satisfied. Seller shall not be liable to Buyer for any compensation, reimbursement, losses, or damages of any kind whatsoever should Seller terminate this agreement as a result of the foregoing.
11. Assignment: Seller may assign, in whole or in part, its rights and duties herein. The rights and obligations of Buyer herein may not be assigned without the prior written consent of Seller whose consent may be withheld. An assignment shall be deemed to include any change in control of Buyer. Any assignment in violation of this paragraph shall be void.
12. Non-Waiver: Any failure by Seller to require full payment or strict performance by Buyer of any of the provisions herein or to exercise any right or remedy hereunder, shall not waive or diminish Seller's right thereafter to demand strict compliance therewith or with any other provision or to exercise any such right or remedy. Waiver of any default shall not waive any other default.
13. Applicable Law: This agreement shall be governed by, construed, and enforced according to the laws of the State of Florida without regard to Florida's conflict of law provision. This agreement shall not be governed by the 1980 United Nations Convention on Contracts for the International Sale of Goods (as may be amended).

## TERMS AND CONDITIONS OF SALE (continued)

14. Force Majeure; Allocation: Seller, in its sole discretion, may reduce or suspend deliveries, or not perform herein, without any liability, whatsoever, by reason of: delays of carriers or inability to secure transportation for its deliveries; labor shortages, strikes or stoppages of any type; fire; accident; inability or delay in obtaining raw materials, supplies or power; court decree; machinery malfunction or breakdown; war; act of terrorism; governmental action or prohibition affecting Seller, directly or indirectly; bad weather, hurricane, tornado, earthquake or other calamity; or any other causes designated as Acts of God or force majeure by any statute or court of law in Florida (each of the foregoing constitutes a "force majeure event"). If it is impracticable for Seller to supply the total demand for the goods because of a force majeure event, Seller may allocate its available supply of the goods among itself (and its parent company and affiliates) and its customers, in a manner that Seller, in its sole discretion, determines to be equitable. During such an allocation, (a) Seller will not be obligated to purchase raw materials from other sources or accede to any demands of labor unions, employees, or any third party, to satisfy its obligations herein, and (b) this agreement shall remain in full force and effect.
15. Resolution of Disputes; Venue; Waiver of Jury Trial: If any litigation arises from this agreement, or the subject matter hereof, the prevailing party, as determined by a court of competent jurisdiction, shall be reimbursed for its reasonable attorney and paralegal fees and court costs at all judicial levels, including appellate proceedings, from the non-prevailing party, and venue for any such litigation shall exclusively occur in state or federal court in Broward County, Florida, which venue the parties irrevocably consent and submit to, and expressly waive any objection. THE PARTIES WAIVE ALL RIGHTS TO A JURY TRIAL.
16. Severability: If any provision herein shall be held invalid or unenforceable by any court of competent jurisdiction, such holding shall not invalidate or render unenforceable any other provision hereof.
17. Confidentiality: The terms and conditions in this agreement are strictly confidential and non-public information, and shall not be disclosed to any third party without the prior written consent of Seller whose consent may be withheld
18. Miscellaneous Provisions: Nothing contained herein is intended to confer any rights or remedies upon third parties or shall be construed to create a relationship of joint venturers or partners; it is expressly acknowledged that the relationship between Seller and Buyer is that of independent contractors. All notices required herein must be in writing and shall be delivered to Seller by facsimile, e-mail, or to the address set forth in this agreement by express overnight courier service or by certified mail, return receipt requested. Notice given in accordance with this paragraph shall be effective when actually received. The goods are being delivered solely for domestic use. Buyer accepts sole responsibility for any determination to export the goods purchased herein and for compliance with local applicable export control laws and regulations. No usage of trade, course of performance, or course of dealing purporting to modify, vary, explain, or supplement the terms herein shall be binding unless made in writing and signed by the party against whom enforcement is sought. The captions contained herein are for convenience and reference only and do not define, limit, extend, or describe the scope of this agreement or the intent of any provision hereof. In the event of any ambiguity in this agreement, it shall not be construed against one party or the other merely by virtue of any such party having drafted this agreement or any provision hereof, it being recognized that both parties have contributed substantially and materially to the preparation of this agreement.
19. Entire Agreement; Modification: This agreement, Seller's sales invoice, and the Bill of Lading, shall collectively constitute the entire understanding between the parties, and supersede all prior and contemporaneous agreements, promises, representations, warranties, guarantees, inducements, and any other understandings between the parties, whether oral or written. Any modification to this agreement must be made in writing and signed by the party claimed to be bound by the modification. No modification hereof shall be effected by the acknowledgment or acceptance of purchase orders, shipping instruction forms, or any other documents from Buyer containing terms or conditions different from or in addition to those set forth in this agreement. All such different or additional terms shall not be binding upon Seller or apply to any business transaction between Seller and Buyer. BUYER'S PLACEMENT OF AN ORDER OF GOODS WITH SELLER EVIDENCES BUYER'S ACCEPTANCE OF ALL THE TERMS AND CONDITIONS CONTAINED HEREIN.

## FREIGHT AND SHIPPING CHARGES

## Complementary Profiles and Trims

All prices included in the pricelist are comprehensive of transport for orders of more than $\$ 8,000$ gross at retail and apply within the continental USA only. Transport is considered from MAPEI to destination. The preferential freight is ground. For orders under $\$ 8,000$ gross at retail, freight and shipping charges will be applied following the table below.

| GROUND FREIGHT CHARGES (STANDARD PREFERRED WAY) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Up to \$500 | $\begin{aligned} & \$ 500 \text { to } \\ & \$ 1,500 \end{aligned}$ | $\begin{aligned} & \$ 1,500 \text { to } \\ & \$ 3,000 \end{aligned}$ | $\begin{gathered} \$ 3,000 \text { to } \\ \$ 5,000 \end{gathered}$ | $\begin{aligned} & \$ 5,000 \text { to } \\ & \$ 8,000 \end{aligned}$ | $\begin{aligned} & \text { Greater than } \\ & \$ 8,000 \end{aligned}$ |
| \$55.00 | \$70.00 | \$120.00 | \$180.00 | \$270.00 | Free shipping |

- Express shipments are available for standard inventory products. Please contact our Customer Service for more information.
- Drop shipments to a third party are subject to a $10 \%$ handling fee.
- For orders below $\mathbf{\$ 2 0 0}$ gross at retail, a handling fee of $\$ 50$ will be applied.

Note: Freight and shipping charges, as well as handling fees, are subject to change at the Seller's discretion.
