

Reference Project Name: Humphrey Pecan S.A. de C.V. resin coating.

CATEGORY : RESIN FLOORING

Project Overview:

- Pecan resin coating to meet legal requirements for food export
- Solution with 3.5 mm Mapefloor CPU system coatings

Project Background

It is a walnut processing plant that was in the process of certification to export its product. The regulation that applies to food and pharmaceutical products requires a sanitary process for which it needed floor covering in 100% of its facilities.

Project information

Period of construction: Septiembre 2019

Year of MAPEI involvement: 2019

MAPEI Coordinator: Agustín Blanquet

Project Owner: Pinturas Osel de la Laguna

MAPEI Distributors: Pinturas Osel de la Laguna

Architect: N/A

General Contractor: N/A

Surface preparation contractor: 7500 m²

Tile and stone installers: N/A

Floorcovering installers: N/A

Project manager: N/A

Photographer: N/A

Project size: N/A

MAPEI products used

- *Mapefloor CPU/MF*
- *Mapefloor CPU/TC*

MAPEI products at work on the jobsite:

- The difficulty of the project is that within the process area the normal temperature ranged from 25 to 35 ° C. The client had tried different alternatives with polyurethane/cement technology and the applied samples of the competition had presented defects in the finish. Aware of the working conditions, the samples were made according to a procedure developed to the needs of the client and the coating was defined in three layers that allowed the installation of the Mapefloor CPU / MF @ 3.5 mm system and Mapefloor CPU / TC @ 16 mils finish, achieving customer satisfaction.
